Thread: [Bot Automation Example using Selenium](#)

jarvur - June 6, 2015, 1:18 pm

Inspired by Tizen's DTG bot.

```
Code import org.openqa.selenium.By;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.WebElement;
import org.openqa.selenium.htmlunit.HtmlUnitDriver;

public class Main {

    private static final String _URL = "http://ddosthegame.com/index.php", _USERNAME =
    "/*username*/", _PASSWORD = "/*password*/";

    static WebDriver driver;
    static WebElement element;

    public static final void print(final String s)
    {
        System.out.println(s);
    }

    public static void main(String[] args)
    {
        print("Connecting...");
        connect(_URL);
    }

    public static void connect(String url)
    {
        driver = new HtmlUnitDriver();
        driver.get(url);

        String userEl = "username", passEl = "password";

        print("Setting username data... (" + _USERNAME + ")");

        element = driver.findElement(By.name(userEl));
        element.sendKeys(_USERNAME);

        print("Setting password data... (" + _PASSWORD + ")");

        element = driver.findElement(By.name(passEl));
        element.sendKeys(_PASSWORD);

        print("Logging in");
```

```
driver.findElement(By.name("login_today")).click();

if (driver.getTitle().contains("- index"))
{
    print("Successfully logged in!");
}

driver.get("http://ddosthegame.com/index.php?page=resolve");

print(driver.getTitle());

driver.close();
}

public static void resolveBot(String username, int amount)
{
    print("Resolving " + username + " for " + amount + "times");
    for (int i = 0; i < 100; i++)
    {
        element = driver.findElement(By.name("userid"));
        element.sendKeys(username);
        driver.findElement(By.name("resolve_user")).click();
    }
}
```

Nice, never thought of using Selenium for anything other than testing. Which is stupid really considering we're on a Hacking related forum, lol.

Nemo2478 - August 2, 2019, 10:49 am

Hello jarvur,

resolveBot never seems to be used.

Regards
