Thread: [Best DNS Servers & info on DNS logging?](#)

roboo176 - June 6, 2015, 3:15 pm

If anyone could let me know if copyright owners & any other related company's could gather enough info on just logging my dns requests, i dont know much about DNS, i did a quick Google search & found a few no log DNS servers but they are just too slow?

Basically i am asking, do i need to use a third party no log DNS server, or am i being too paranoid?

Thanks in advance for any directive or help!

Did you have to bump a year+ old thread? Have you tried contacting Ra4w directly?

Is OpenNic still what people are using or are there other services?
