Thread: [*##>>RAT INSTALL SERVICE MAKE SURE YOUR RAT WORKS B4 SPREADING>>>##*](#)

ROFL OMG - June 7, 2015, 5:56 pm

Hey guys I am currently selling a RAT / Keylogger testing install service. After reading so many people in the Remote administration tools section asking for people to test their RAT's I figured I would offer this service. Who wants to spread their RAT/Logger without knowing if it is actually functional? Most rats you can't test on your own connection even if you are using a virtual machine so this way you can make sure that it is working before you spread.

How this works, comment below saying that you are interested in a RAT install, I will pm you the details and how to send me the RAT. After payment I will install the rat on my machine (its not a virtual machine using VMware or VirtualBOX)
you will skype call me and screenshare or teamview So i can see that it has indeed been installed and you must uninstall it after words.

PRICES: 1.00 in BTC, 2.00 PayPal 1.00 Skrill

EDIT: FREE FOR Ub3R/ep1c USERS.

Post below if you are interested

I highly doubt people will be interested in this, you can buy 10-20 installs for that price.

Alison Wonderland - June 7, 2015, 6:02 pm

you can get 10 installs per \$1

Unless you plan to offer more than just a test install
this price is above and beyond what youll ever get

Pm'd you, just send me your skype name and we can get started !

ROFL OMG - *June 13, 2015, 10:39 am*

free RAT installation for ub3rs/l33ts

The Scarabian - *June 13, 2015, 2:45 pm*

Very overpriced. The poor L33ts and Regulars could buy 10 installs for 1 dollar.
