As always, Savage here has released another outstanding service.

I seriously and wholeheartedly recommend people to take advantage of this while it's available, I'm involved in this and I can tell you the information that is being provided is better than anything else you'll find on your own. Everyone involved is truly an expert in what they do and there's no bullshit or fluff too it.

This looks very good.

I'll be keeping a tab on this as I can see it growing into something that is grown outside of HackForums as well.

I do SEO and charge \$50-75 for CPA/PPD websites a month for 6 keywords and provide my clients with SERPBOOK links so they may track their progress and send bi-weekly reports of links built. We can get good results within a couple months depending on niches and quicker many of the times.

I have many clients on skype I'd be glad to provide service here too. Thanks.
