I haven't seen too many video tuts on this. Many people learn differently than through pictures and text. Which is why I made a video tut into detail ?

chozenHack - June 16, 2015, 3:33 pm

I like that part. Wouldn't have found this otherwise.

Ok, so I tried this, but my animation doesn't loop and plays only once. I am sure I neglected something, but can't figure out what it is. ???

Cyberdroid - June 19, 2015, 2:32 am

Nice. I like the animation it's so smooth.

When you save it to the web make sure the loop is checked for "forever" instead of "once" ?

Hey man! I'm new to Photoshop in general, and this is the first time I'm doing anything with motion. I followed the tutorial (I think) perfectly, but it seems like it takes forever to reloop the gif.
