Thread: [Insert a custom text quickly in your posts and send it automatically.](#)

Hash G. - June 18, 2015, 1:27 am

Hey,

If you are tired of always repeating the same shit in your posts then I made this for you.
You can also use it to quickly insert your signature, and send the message automatically after that.

GIF Preview : [\(Click to View\)](#)

How to install it :You will need to install a script manager :For Firefox, use [GreaseMonkey](#).

For Chrome, use [TamperMonkey](#).

Then, just go [here](#) and click on "Install this script", and then on "Install".

If you want to review the source, just click on "See the source of the script".

Let me know any bugs/ideas you want.

Hope you enjoy !

My others userscripts : [\(Click to View\)\[Userscript\] HF TRUSTSCAN || ADD THE TRUSTSCAN & DEAL DISPUTES BUTTONS ON THREAD'S POSTS](#) by [Hash G.](#)

[\[Userscript\] HF AUTOSIGNATURE || INSERT YOUR SIGNATURE EVERY TIME YOU POST](#) by [Hash G.](#)

[\[Userscript\] Select what's inside the \[code\] tags.](#) by [Hash G.](#)

[\[Userscript\] HF currencyConverter\(\) || REAL TIME CURRENCY CONVERTER !](#) by [Hash G.](#)

Changelog [\(Click to View\)](#)1.2 :You can now add titles to your custom texts. If you don't set any titles, the button won't be displayed.

Updated the code to generate the buttons, it will be faster now.

Updated the behavior of the save button.

Spaced everything as suggested by Happeh.

1.1 : Added 4 fields as suggested by Roger Waters. We then have 5 fields as of the 1.1.

Updated the place of the "Save" button.

Updated description, name and link in the OP.

1.0 :

Initial release

Atharva - June 18, 2015, 7:06 am

Bitcoin: [1HaxXK3mxe2i1mwdqMSLHDqj5rnjmoKN6Y](#)

EDIT: It works. Thanks :D

I'm glad you're happy ! :)

b?xxy - June 18, 2015, 11:20 am

This is just going to increase the number of spam here.

I just manually type everything out because I am not a snail when it comes to typing.

Good job though I guess.

Trenchguns - June 18, 2015, 11:23 am

Well, this certainly seems interesting. I'll have to try it out later when I get home. Don't know what I'd use it for though XD

Meow - June 18, 2015, 1:46 pm

Roger & APG should install this. Thanks! ?

Hash G. - June 18, 2015, 1:53 pm

Good job though I guess.

When you really want to spam you just cypypasta the same shit, you don't have to bother with a userscript. Here it was more for Mods, they always need to repeat the same things.

(Jun 18, 2015 11:23 AM)Trenchguns Wrote: [\[CITE\]](#) Well, this certainly seems interesting. I'll have to try it out later when I get home. Don't know what I'd use it for though XDThanks :)

(Jun 18, 2015 01:46 PM)Meow? Wrote: [\[CITE\]](#) Roger & APG should install this. Thanks! ?They surely already have something like this.

Roger Waters - June 18, 2015, 4:10 pm

(Jun 18, 2015 01:46 PM)Meow? Wrote: [\[CITE\]](#) Roger & APG should install this. Thanks! ?
Would need more features in order to use this. Not everything we type is the same you know.

Hash G. - June 18, 2015, 9:23 pm

(Jun 18, 2015 04:10 PM)Roger Waters Wrote: [\[CITE\]](#) Would need more features in order to use this.
Not everything we type is the same you know.
What would you like me to add ?

\$lick - June 19, 2015, 7:29 am

You should set up auto-posting of test as well, like people have with signatures.

Nevermind, done it myself.

Roger Waters - June 19, 2015, 10:45 am

(Jun 18, 2015 09:23 PM)Hash G. Wrote: [\[CITE\]](#) What would you like me to add ?
More buttons and more custom text.

Hash G. - June 21, 2015, 9:16 am

(Jun 19, 2015 10:45 AM)Roger Waters Wrote: [\[CITE\]](#) More buttons and more custom text.
I'm working on an update with more buttons, as requested. 5 is enough ?

The Godfather - June 21, 2015, 10:14 am

This might be helpful to the post count booster lol

FantaŠec - June 21, 2015, 10:18 am

I will also download this soon, you should make it a textarea rather than a textbox for easier formatting. Also, more text fields ~1-6?

Hash G. - June 22, 2015, 1:40 am

(Jun 22, 2015 01:38 AM)xadamxk Wrote: [\[CITE\]](#) I've seen this idea before, and actually use something similar.

But you implemented it differently and have better potential, I like xD

Keep us updated man.

Thank you for your kind words adam ! Coming from you it means a lot :)
The update will be out tomorrow I think.

And as for textarea; it's not a bad idea. I'll see how can I implement it.

??xSc0rP!0N?? - June 22, 2015, 1:42 am

Nice, I really liked it. Thank you m8 for sharing this.

Warm Regards

Hash G. - June 22, 2015, 2:03 am

(Jun 22, 2015 01:42 AM)xadamxk Wrote: [\[CITE\]](#) What do you mean text area?

If it's relevant, my script is hard coded so when I do [i*ntro] it outputs this:

A textarea is like a larger text box, to input more content. Idk how to explain it, so see this :

<http://hashg.xyz/xadam.html>

You're using Snorlax userscript, right ?

woahxx - June 22, 2015, 10:48 am

I don't see the textbox in the cpanel.

Hash G. - June 22, 2015, 10:50 am

(Jun 22, 2015 10:48 AM)Emilovic Wrote: [\[CITE\]](#) I don't see the textbox in the cpanel.

Can you explain a bit more please ? The script is active in GreaseMonkey/TamperMonkey ? Can you PM me some screenshots ?

Thanks,

Roger Waters - June 22, 2015, 12:49 pm

(Jun 21, 2015 09:16 AM)Hash G. Wrote: [\[CITE\]](#) I'm working on an update with more buttons, as requested. 5 is enough ?

5 should be fine for now.

Happeh - June 22, 2015, 2:59 pm

Been using this recently. Saving me big time, thank you!

Hash G. - June 22, 2015, 3:16 pm

(Jun 22, 2015 02:59 PM)Happeh Wrote: [\[CITE\]](#) Been using this recently. Saving me big time, thank you!

Thanks for your kind feedback ! :)

@RW: It will be out by tomorrow :)

The new version is out. You can see the changelog in the first page. Thanks.

Hash G. - June 23, 2015, 3:19 pm

The new version is out. You can see the changelog in the first page. Thanks.

Happeh - June 23, 2015, 4:28 pm

Possible to have a larger space between buttons. They're overlapping right now and I can see myself hitting the button rather than replying:

Hash G. - June 23, 2015, 4:30 pm

(Jun 23, 2015 04:28 PM)Happeh Wrote: [\[CITE\]](#) Possible to have a larger space between buttons. They're overlapping right now and I can see myself hitting the button rather than replying:

Thanks for the feedback, I'll space this a bit.

And also I'm thinking to add titles to your custom texts instead of picking the first 10 letters of the message. Thoughts ?

Roger Waters - June 23, 2015, 6:25 pm

(Jun 23, 2015 04:30 PM)Hash G. Wrote: [\[CITE\]](#) Thanks for the feedback, I'll space this a bit.

- Yes it's normal, you need to remove the whole title in the settings.
- I think it's because you have not enabled the 2FA, because of this message.

Roger Waters - June 28, 2015, 10:15 pm

You should change the class of the button to save it to "bitButton" so it changes to the CSS that special userscripts have.

Trenchguns - June 28, 2015, 10:16 pm

WTF. I was just thinking about this a few minutes ago, and was gonna search for it, thanks roger for creating my fate! Or however that's supposed to go XD

Niko - June 29, 2015, 12:49 am

Not sure why its not working for me

Browser: Opera (Latest)

Userscript Engine: ViolentMonkey

I Disabled the red Gauth text with adblock, that didn't help, and I cant see the buttons in the reply here either

Spoiler ([Click to View](#))

Hash G. - June 29, 2015, 1:35 am

(Jun 28, 2015 10:15 PM)Roger Waters Wrote: [\[CITE\]](#) You should change the class of the button to save it to "bitButton" so it changes to the CSS that special userscripts have.It doesn't change anything, or am I blind ?

Spoiler ([Click to View](#))Are you running other userscripts ? If so, please list it.

Are you sure this script is activated in ViolentMonkey ?

Can you test on another browser ?

Thanks

Zone Sirius - July 8, 2015, 4:24 am

Does this only work for HackForums? PM me.

Hash G. - July 8, 2015, 9:07 am

(Jul 8, 2015 04:24 AM)Guardians Wrote: [\[CITE\]](#) Does this only work for HackForums? PM me.

Yes it does. If you want me to do it for other websites, I can.

Eternal. - July 31, 2015, 2:19 pm

This is unbelievably amazing, thank you!

Hash G. - October 21, 2015, 12:20 am

Just pushed a very little update to fix it. Thanks [PrivateDonut](#) for warning me that this was no longer working.
