Thread: [\[PDF Exploit Fix\] Sorry, I'm picky. Incompatible PDF structure\[FIXED\]](#)

Tyler Durden. - June 8, 2015, 10:17 am

[Hello, I would like to announce that I've finally come up with a method, to fix the error: "Sorry, I'm picky. Incompatible PDF structure: key not found: "Root". Please try a different PDF template." in the PDF Backdoor Tutorial I made.](#)

[I have updated the thread, and the solution is in there.](#)

[Thanks for reading.](#)

Since you are actually keeping this 2013 thread alive and fixing issues with it etc.. should i presume that it is still a valid payload delivery method?

EDIT

With a bit of work, you could make it a standalone package, eliminating most of the need for metasploit

Converting Metasploit Module to Stand Alone
