Since people are having issues with how to use it, there will be a dedicatedd section on the thread to guide you through it.

<http://api.governments.ml/cmd.php?key={key}&type={resolver}&arg={input}>

1) First, replace "{key}" with your generated key. Now, it should look like this:

<http://api.governments.ml/cmd.php?key=RandomKey&type={resolver}&arg={input}>

2) After that, remove the two brackets around "{resolver}". Now, it should look like this:

<http://api.governments.ml/cmd.php?key=RandomKey&type=resolver&arg={input}>

3) Finally, replace "{input}" with the username. The end result should look like this:

<http://api.governments.ml/cmd.php?key=RandomKey&type=resolver&arg=udpamplification>

Output: 198.50.243.232 (1539ms)
