WHAT THIS THEME IS

This Theme is called "Titanium X", it's a theme made by Me (R00t M4st3r), Admin of Cr4ckinaB0x.com. I give everyone right's, and Authority to do as you wish with this theme. I've gotten many reviews about how it is a good theme specifically for dark websites like Gothic, Killing, Warcraft Type, Asian, Hacker, what ever really.

Nice theme. Was it originally a vBulletin theme that you ported over to MyBB? Looks very familiar to something I've seen many years go.

The theme is still working and works for 1.8.x.
