The Epic Not-So Pro E-Whoring Guide (KiK Method)

As not many of you may know, my handle is 'epicwafflerave'. Now, why is that important? I don't know. That's the only reason Epic is in the title. Do know this however: I've been E-Whoring for quite sometime and decided to finally share my knowledge. This is a harsh revamp of this post (<https://hackforums.net/showthread.php?tid=4847218&pid=46406550#pid46406550>). I do recommend that you also read boxxy's tutorial. Because how can you be a HackForums E-Whore without reading it? If this helped you, please just drop a simple 'thanks' so I won't cry when I go to sleep.

This thread might seem all over the place, but I'll surely attempt to clean it up.

And Then There Were Downloads - Section One/Uno

How to Have A Orgy 101: Kik/Bluestacks/Fake Camera

Before you E-Whore you of course have to download a small list of the essentials. This includes Bluestacks/Downgrade KiK/Fake Camera (FC).

Bluestacks:

<http://www.bluestacks.com/download.html>

KiK:

<http://www.mediafire.com/download/mkylvf2a3g2h1l3/kik.android-7.3.1.111.apk>

Fake Camera (FC):

<http://www.mediafire.com/download/mz1pri8y66od73m/cz.shmoula.android.fakecamera.apk>

To install KiK or Fake Camera, please make sure you have Bluestacks first. Or else it'd be pointless performing any of these steps.

Installing Method 1 - Simply double click both apps until a notification pops up saying that the APK Handler is installing them.

Or Installing Method 2 - Simply left click both of the apps and click on the option that includes the Bluestacks APK Handler. A notification should pop up saying that the APK Handler is installing them.

--Downgrading Your Current KiK Version - Go to the 'Search Apps' icon for Bluestacks. Click on it and type in 'Kik'. Kik should open, but click the back arrow to close it. The appstore page for Kik should now be open. Just click 'Uninstall' and then install KiK using one of the methods above.

How to Have A Orgy 102: Picture Packs/How to Use Fake Camera/How to Make Pic Packs

What is a picture pack?

A picture pack is a KiK E-Whore's best friend. Picture packs or pic packs are packs full of selfies and nudes of a girl that're sold to customers, or people mostly referred to as 'pedos'. No matter what. Even if they're not a pedo, they're still a pedo. Anyway, pic packs come in all shapes and sizes, much like humans. They also don't discriminate. There's Caucasoids, Negroids, and Mongoloids. They also come in any gender. No discrimination. Only love and money. That's awesome. But how do I attain or make these?

Attaining a pic pack is quite simple. You can choose to make one, or download one. Sadly, I won't post links to some of the good E-Whore packs that I've downloaded from here. But that's only because I don't want to steal credit, and a lot of the people they're from have now gravitated to selling packs. Which leads to the third proposition. Buying a pack.

Making A Pack -

There's really no long instructions for making a pack. But there are sites you should possibly use for making them. I do have to warn you to not get pictures with watermarks. If you choose to, please edit them out. Here are a few sites I choose to use:

Motherless

Good for close-up videos, amateur and also high quality pics. Most feature no watercolors. Mostly used for female picture packs.[r/GoneWild](#)

Good for amateur pictures. Please be wary of watercolors. Mostly female posters, so female pic packs.[r/GirlsGoneBitcoin](#)

Good for amateur pictures. Please be wary of watercolors and verification pictures. Also has amateur videos. Please be wary of verification videos.[r/GuysGoneBitcoin](#)

Good for amateur pictures for gay e-whoring. Please be wary of verification pictures.

Tinye

Tinye.com - A good image reverse tool that you can use to find sites for making picture packs.

Downloading A Pack -

I'll include some fresh packs once I get down making them. Please, if you download these packs, shoot a thank you to the creators.

Fiix - <https://hackforums.net/showthread.php?tid=4144754>

Regulus -<https://hackforums.net/showthread.php?tid=4144754>

Mr. Robot (Also a good fucking show!) - <https://hackforums.net/showthread.php?tid=4850975>

Kemistri - <https://hackforums.net/showthread.php?tid=1189770>

Buying A Pack

Since I'm a scrub and for some reason my HF searching isn't working for me, and I swear I had the links to pack shops... If you're a seller please post and I'll include a link to your shop.

Using Fake Camera

To use Fake Camera or FC for KiK to upload live picture or picture proof, just go to the camera option instead of gallery and FC should pop up as a option.

Social Engineering Stress Popper and Other Topics - Section Two/Dos

How to Discreetly Order Anal Beads - Social Engineering/Talking to Customers/E-Hoes Vs. E-Whores
Social Engineering

Basically the who/what/where/why Jerry died. Social Engineering is basically what to say to a customer to get them to buy or feel a emotion towards you. What to really pluck their heartstrings with and so on. What to do to get more money or pull off double dipping and such.

How can you get up your Social Engineering/SE skills? I recommend 'flirting' or engaging in conversation with a few customers if you're a beginner.

E-Hoes Vs. E-Whores

A pedo pretending to be a girl to get nudes, someone who trades themselves out for nudes, etc. Also the classical teen or kid pretending to be older and sending dick pics. These are colorful E-Hoes. Also a person who sells at ridiculously low prices. Such as 600 pics for \$10.

E-Whores are people who make money from selling pictures of girls or live cam shows. They mostly block E-Hoes or sell to the fortunate ones, but be cautious of E-Prostitutes that tread on your territory.

Talking to Customers

When talking to customers, use text speak (not too much) but do shorten words and such. Also, please don't get too involved with these guys. I cannot stress enough to NOT get too involved with these guys. When you know the type of car they drive, who they work for, their boss' name, color of their pillow, what type of pillow they like, and what their favorite swear word is (Oh, you know who I'm talking about Host!), that's way too much. Make them feel special, whatever, just don't get too involved.

I've got a very short commands list that I use very often. This covers the things I also use for traffic posts, but that's a bit towards the next section.

Some of this happens to be things I use personally, such as UblaPay but that's for the next section as well. <http://pastebin.com/UBQgEJai>

You might see a lot of commas or spaces like a hyper kindergartener just learned how to make a paragraph. Why is that there? I put them there to make the sentence longer just so that the guys won't see the price unless they click on it. This shows me the bummy as fuck ones that don't even bother to say they're not interested.

I'll definitely work on it whenever I get the chance to and make it a bit more shazzy. I was just a bit scared about the characters limit which I'm barely under for the first sections...

But nobody has ever given me a heart before :DDDDDD. I think we should adopt kids and start a family at some point.

Yeah, content-wise it's good. :)

Sorry about the heart, was still in character lol ?

Excellent guide. This along with boxxy's should be a must read for any beginner who wants to get started with e-whoring. I suppose that it's also worth mentioning the other popular gonewild subs such as /r/AsiansGoneWild,/r/PetiteGoneWild etc.

Mac Marvin - June 9, 2015, 11:29 am

I made 50 bucks in about two hours using pretty much all the methods this guide mentions. Highly recommended for people starting out in the e-whoring business.

Vaxorr - June 9, 2015, 11:37 am

That's from the few HQ tutorial on this section, good job man.

Sahaj - June 9, 2015, 11:44 am

HQ tutorial. Thanks for writing this man!

Erby - June 9, 2015, 12:37 pm

Eh, just realized I forgot another section. Whenever I can, I'll update it with a section about payment processors and anything else I forgot.

Again, thanks guys.

Kazz - June 10, 2015, 1:54 pm

Followed your Tutorial. not exactly but pretty close. Never e-whored before. came up with \$35 in about 2 hours. thanks dude!~

liamsi - June 10, 2015, 2:42 pm

I discovered what SE means thanks to your thread.

Great tutorial!

Edit: I started E-Whoring right after reading the 12 rules, I didn't know you were the author ?

Freisetzung - June 13, 2015, 9:37 pm

I really like where you say you need to build relations :) That's how it seems to get them all the time. Good post!

This is a really good method for beginners. I've never done this before, but I'd like to get into it to earn any amount of \$\$.

I'm gonna use this method really soon and hope to come out successful.

Thank you for this!

Reading this, along with boxxxy's guide you are pretty much guaranteed success with e-whoring. It's not rocket science, just requires a bit of persistence.

Thanks for reminding me to go read boxxxy's guide haha!

I'd say I'm a very persistent guy(totally the reason all the girls I've talked to don't like me;)

Probably the best advice I can give on e-whoring is to just don't stop and keep at it. I haven't done any serious e-whoring in years, since the CL method was popular but I remember one week where I had been e-whoring from 12AM till past 3AM and didn't make a dime for 3 straight days, then on the 4th day I managed to milk some guy out of nearly \$400. Your persistence will end up paying off.

Dude that gives me some extra motivation to actually do it. That's awesome though! Do I just ask for \$\$ via paypal? or amazon?

It's for you to decide what payment methods you are willing to take. I've been taking Amazon GC's exclusively for quite a while now as there is less risk involved in my opinion. People can still charge back the gift card via their CC/bank but I feel it's way less likely than say someone charging back on PayPal.

Just keep all options on the table and decide which is best for you. You should be all set now.

Thanks for the advice, Spigot! I'm trying to come up with ways to ask them to send me gift cards.

what is a good price to sell picture packs for. Like how many pictures and/or videos for how much??

It all depends. There's really no perfect price. I sell my pics high because I have quality traffic. But sometimes I also let the guys decide on a price. A lot of the times they go higher than my set price. The only thing I can advise you to do is try both, and also, not sell extremely cheap.

I sometimes make a price depending on how rich they are.

If I know they have money, I will increase the price to make as much as possible possible

Erby - June 20, 2015, 7:07 pm

Just to let people know that the updated version will be out tomorrow morning, probably a little before noon central.

EDIT: Guys I'm terribly exhausted. This isn't a cheap thing to get out of releasing the guide. If I don't release it at around that time, then I'll either post a small section of it or something. The exhaustion is just due to a poor diet across the past few days, sleep problems, etc. The new guide is going to have a slight name change is the only thing I'm disclosing currently, besides the fact that it's going to be a better format and more colorful. Thank you all for understanding.
