Thread: [\[TUT\] How to Viewbot Twitch.tv for free](#)

Mitch - June 9, 2015, 5:20 pm

Hello, I found a tutorial in this section a while ago about this, but I can't find it anymore so I am going to try my best to re-make it. If you find the original thread please link it to me! ?

This program also has chat and follow bot, but this tut will focus mainly on the view bot.

Step 1: First, you will want to gather your proxy list. If you already have a proxy list that works you are good, but if you don't download the program GatherProxy. Once you open it just click start and wait a few minutes for the program to finish gathering. Once it is done, right click the list it has generated and hit "Export All". (These proxies aren't that good, but will still get you about 50-85 Viewers)

Step 2: Open the view bot program and enter your target at the top. Then look at the bottom right and click "Manage Proxies" then "Import HTTP Proxies" and wait for the list to load on the screen

Step 3: Put the viewer count to 500 (Because many of these proxies wont work) and click "Initialize 500 Instances". Wait about 5 minutes for the viewers to fully start and load into the stream.

Step 4: Once you think all the viewers have caught up, you can click "Initialize 500 Instances" again, to start the cycle list and squeeze out a couple extra viewers.

That's it! If you have suggestions on how I could make these instructions more clear, please let me know.

Thank you ?

Still open to any suggestions

works to an extent, people will call you out on it though if you don't have chatters/etc

Thanks for the tutorial OP , working great !

LosPollosHermanos - June 10, 2015, 1:07 pm

Indeed is easy enough, get about 12 to 15 viewers :)

EDIT: After about 20 to 25 mins i got banned from Twitch. So be carefull!

Good fucking job man great tutorial aswell +1

KaliKid - September 19, 2015, 1:39 am

Thank you for this its a nice tutorial that i will use!

Dj Keylogger - September 19, 2015, 6:06 am

Good idea. That looks perfect. Nice guide too.

Arcu - September 19, 2015, 6:48 am

Thanks for this!

Gotta try it to troll a friend.

master_chieff - September 21, 2015, 12:10 pm

Sometimes the program crashed

Any idea why that happens?

woodpig - September 22, 2015, 11:11 pm

When can I purchase strong proxy lists?

Electronix - September 23, 2015, 10:26 am

Do they ban for doing this ?

botrus - September 23, 2015, 10:34 am

<https://hackforums.net/showthread.php?tid=4685690>

You really just copied my guide but the more people who viewbot on twitch the better IMo :)

Same thing I have in my Video

Do they ban for this %100 YES!

If you are stupid enough to viewbot from the same IP you stream from. You should get banned for being stupid

They can see where the traffic is coming from. Most proxies will be transparent as they can see it's all coming from X ip

If your X ip is the same you stream from you can and will be banned.

Just buy a VPS or a VPn and you can viewbot for days it all comes down to your proxies

For 1000 proxies that are good you will get anywhere from %5 to %20

So if you want 200 + viewers you need to have 2000 + proxies

You will NEVER get a 1 for 1 proxie unless you are paying for real private ELITE proxies not some bullshit someone says it's private !

Have fun and view bot on

So if my friend try to viewbot my twitch stream i wont get banned ? Or by using viewbot on a vps?

BaseHaxor - September 24, 2015, 8:00 pm

Thank you for the share, I will certainly look into this view bot. Perhaps free proxy soc5 proxy services / lists might help. :)

Restored - September 25, 2015, 4:23 am

Thanks for the great tutorial. Will try out soon.

botrus - September 25, 2015, 9:42 am

IF you guys want to viewbot BUY A damn VPS! it kills ur cpu + the u won't get banned if it's coming from another IP that you don't stream on

Also don't show it on stream don't be stupid

Pureosouza - September 25, 2015, 10:36 am

Hi can you help me with this
