Well, you neither are OP, nor you posted any virus scans either.

All I could see is your "words" that it's "not infected", ain't enough to let somebody's reservations away for being infected.

Beeping - June 11, 2015, 3:49 am

It's a .exe file, I'll update this post with a scan.

"Check it"? And you think Sandbox identifies or differentiate between "good" and "bad" or potentially harmful programs? Well, this is not "lmao", but "roflmao". ?

You really need to wake up and smell some coffee mate.

Go here, and read some more about what Sandbox actually does. Consider it a token from me. ?
