Thread: [\[Personal\] PPD method \[No link, ALL in thread\]](#)

Beeping - June 11, 2015, 5:26 am

This method is from my e-book for those who haven't seen it.

OVERVIEW:

- 1: You will find out about the best pay-per-download network
- 2: I will give you some bots to use (Fake tools IE: "Paypal money generator" for your videos.)
- 3: Making a short video!?
- 4: How to double your amount of money that you earn
- 5: Method
- 6: Some crap you have to know

--

First step:

Ok so first of all, you might have heard of PPD. What is PPD? PPD is where you get paid for people downloading a file (doing a survey), you normally earn around 1-20\$ from this site.

The site I'll tell you about is SHARECASH! Unlike other sites you do NOT need a high amount to cash

out, and you get paid around 1\$ per download.

You may be wondering do people download the files and do surveys? Yes they do. I will show payment and download proof in the other PDF file.

Second step:

BOTS. You are going to need these for your videos to make it look legit, so here are some links to a few bots. You can download them and use the ones you want (More is better)

PAYPAL:

<http://www.mediafire.com/download/474n5iaedeewb4f/PayPal.zip>

AMAZON:

<http://www.mediafire.com/download/mgztr82dhczu460/Amazon.zip>

NINTENDO: <http://www.mediafire.com/download/kw8145z9w4wgvxi/Nintendo.zip>

ITUNES:

<http://www.mediafire.com/download/5i5hcmnaf1e56xr/iTunes.zip>

The links go to mediafire, and you can virus scan yourself. No viruses involved, but these tools are needed for this method.

Third step:

Make a short youtube video. Go on google and search "action recorder free trial", and get the 30 day

free trial. Action is the best recorder in my opinion because it has no lag and it's easy to use.

Use action (Or any other tool you may have) and record you using one of the bots. The goal in the video is to make it look like the bots are legit and working. You can change proof in paypal using

Fourth step:

DOUBLE YOUR MONETIZING!

Instead of getting 1-20\$ per download, you can add on some more money to your links.

Not everyone will do surveys, so you can still benefit from those people by using an adf.ly link.

Sign up on the site and shorten your link, and put your sharecash link into your videos description and pastebin. This will get you money from people clicking AND from people doing surveys, so an average of 1-20\$+ per person.

Fifth step:

So what you will be doing is actually pretty simple, once you learn all the above and understand. What you are going to do is make a video with the bots showing how they work

and that the download link is in description. Then you will take those bots links from ShareCash and shorten them on Adfly, then put them in your video description.

NOTE: You should not delete the videos, because if youtube deletes your video you will have it on your PC so you can re-upload it. Be sure to create lots of different youtube accounts to do this incase

one gets banned, for the most efficienct use of the method.

Here is a link to get your videos to the top of youtube:

Virus scan:

PS: I made 6\$ in an hour last night, with no effort or uploading or anything.
Last time I uploaded was last week.

It's the 301 method just applied to a large tutorial that can be found 50-60 times on this sub.

Anyway so much wrong shit about what you say :

"NOTE: You should not delete the videos, because if youtube deletes your video you will have it on your PC so you can re-upload it. Be sure to create lots of different youtube accounts to do this incase

one gets banned, for the most efficienct use of the method."

- Nope, once your video is flagged you cannot re-upload it or you will get instantly banned again, you need to change the md5 hash.

- Adf.ly Will reduce your conv rate for sure.

- Short Video = Shitty needs at least 1 minute to 2 mins.

Anyway your niches are outdated and won't earn you shit.

This method has been posted so many times. There is also so much wrong information, as pointed out by Eagle™.

Never say this sort of thing as it's not exactly true. If I told people what my niches where, they would call them shit and outdated, but hey, I'm earning ~\$100+ a day. It's always the stupid shit that people laugh at and think is bullshit which someone takes, adds something to the idea and makes a shit load of \$\$.

Chrome says your file has a virus!

Beeping - June 12, 2015, 4:34 am

It doesn't, try virus scan it. Or, disable the protection thing idk

GunshotZ - June 12, 2015, 4:41 am

Thanks for share works great

Ok then, can I would like to have your niches methods please?

Thank you.?
