Design 7/10 The design of the website is faily simpel and basic, easy to understand and does everything that would be required of it.

Ease of use 9/10 For the "afterpurchase" part, this might be the easiest out there. There is no signup required and you get mailed (I guess) a token. This token allows you to generate unlimited minecraft accounts. You can bookmark the token as seen here
Code [https://minegen.co/gen.php?token=\[your token\]](https://minegen.co/gen.php?token=[your token])which increases the ease of use. Never login or signup just click the link.

Quality 8/10 The overal quality of the site is fine, the accounts load relatively quick and all the accounts I tried so far seemed to work. By just a click of the button you can have another minecraft alt. Which minecraft player wouldn't want that?

Overal 8/10 I would rate this product an 8, there are other generators out there. But this one seems to be the only one that doesn't require a signup in order to start generating. I myself really like the concept of the generator. The only thing I'd say I dislike is that if you've purchased the generator it will still always have the "Purchase" option there. But thats just me being me.

Anyway I'd like to give a huge vouch to [Kronus](#) and for this product.

I have been given a vouch copy of the MineGen.co Minecraft Generator by Kronus and I'd like to leave a huge vouch for this user and his outstanding service. This generator is exactly what it says on the tin.

Generator:

The generator is embed in a sleek design which is very high quality.

I've generated over 6 accounts now and all 6 have worked a treat. Anyone thinking about purchasing access to this gen will not be disappointed. Very high quality user offering a very high quality product. I would add more but honestly, this generator is faultless.

Overall rating: 10/10

The web interface is extremely clean, and could not be simpler.

I generated several accounts that all worked straight away, no issues.

10/10, nice and cheap for what you get here.

Not much more to say. It works great, looks great, and can be accessed from anywhere.

(Dec 24, 2015 07:52 PM)Hu300300a Wrote: [\[CITE\]](#) I definitely recommend MineGen for anybody that wants access to an arsenal of premium Minecraft accounts that actually work. Kronus is a friendly guy, and you are easily able to trust him and his products.

Immediately after getting my hands on MineGen, I was greeted with a basic webpage with a very simple design and layout. There was nothing prompting me to login or sign up, no confusing interfaces, no cluttered tabs -- just a simple box asking me to put in a token. After putting in my token, which is much easier than having to constantly log in with a username and password like on most other sites, the page quickly changed and I then saw a single button labeled 'generate'. After clicking this button, an email and password instantly appeared, and I was able to copy and paste them both into the Minecraft launcher and log in with absolutely zero issues.

I really do not see any problems with MineGen at all, and even after generating more than ten different accounts, they all worked flawlessly. I can picture the generator being used to generate accounts to evade bans, duplicate starter items on the servers that offer them, or just to simply trick people into believing you're someone else. The possibilities are endless. There's also a way to favorite any accounts that you generate, which is actually really great in case you lose the email and password to an account you liked.

Easy to use, GREAT PRICE, and fully functional.

(Jul 6, 2015 05:53 AM)Sahaj Wrote: [\[CITE\]](#) Bought the lifetime membership of MineGen.co and I must say, this generator works like a charm.

Design - 10/10

The generator looks sick, sleek design, flat UI, love it.

Accounts - 10/10

I generated 15 accounts to see if they actually work, I have bought memberships of many generators before, but I always get like 12/20 accounts working. But with MineGen.co, 15/15 accounts were working. I do not have any regrets regarding the purchase of MineGen.co.

Interface - 10/10

The generator is easy to use, even a person who is using the internet for the first time can use this generator. It's clean, with instructions on how to use and the support provided by Kronus. It's super fast. It's a One-click account generator.

Overall - 10/10

No doubt, MineGen.co generator is value for money. I recommend everyone on the forum to get their lifetime memberships now. It's super fast, reliable and easy to use.

(Dec 24, 2015 07:37 PM)Aggron Wrote: [\[CITE\]](#) There isn't much to review about this product as it is just a generator, but here are some points.

[+] Most of the accounts are valid they should last long also.

[+] You have a favorite function what is actually pretty neat.

[+] I like the simplicity of this.

[+] It is webbased so you don't have to download a program.

[-] I really don't like how the security works as you use a token in order to obtain access, those tokens can be easily bruteforced and used in a other session.

This Minecraft account generator is top notch. Every account I have generated did not fail to satisfy me, and they all worked great! I love the generator's simple design, as it is not too complicated to find everything. I also love how you don't need to sign up for an account to purchase, you go straight to the generator and paste your token every time, I give this Account Generator a 10/10 because it is simply amazing!

The account generator is now working for me :)

It generates accounts quickly, the only downside is that it seems like someone changed a lot of the passwords to the accounts that I've generated.

It would be nice if you implemented a button that would check the account if it is valid or not instead of wasting time to copy and paste then find out its not working.

Overall, the site has a nice layout, fast generation of accounts, you're getting more than what you paid and Kronus helps you if you have problems.

I would recommend this to anyone looking for a MC account generator :)

Please implement a check button or make that process automated thanks! :)

This account generator is exactly as it says on this thread, definitely affordable (only \$5.99 for unlimited Minecraft Accounts), and the website is smooth as can be. The color scheme and simplicity is insane, and I would highly recommend this to anyone that plays on faction servers, or any server that has perks with extra accounts. These alternate accounts have made it possible for me to get my power well over 300 using them. So far every account has worked that has been generated and this has been well over 15.

Vouch for Kronus and Minegen.

It works super well and fast. Its simple and does exactly as said. On top of that the website is lovely and clean. Great product!

Thanks

Perfectionist - July 6, 2015, 3:52 am

OP gave me a vouch token and I really have to say, this is a really good and well working generator. It takes only a few seconds to create a new account, and they're working nicely.

It has a nice design too;

If I played Minecraft, I wouldn't hesitate buying since it's only \$5.99 :p

Vouch!

Sahaj - July 6, 2015, 5:53 am

Bought the lifetime membership of MineGen.co and I must say, this generator works like a charm.

Design - 10/10

The generator looks sick, sleek design, flat UI, love it.

Accounts - 10/10

I generated 15 accounts to see if they actually work, I have bought memberships of many generators before, but I always get like 12/20 accounts working. But with MineGen.co, 15/15 accounts were working. I do not have any regrets regarding the purchase of MineGen.co.

Interface - 10/10

The generator is easy to use, even a person who is using the internet for the first time can use this generator. It's clean, with instructions on how to use and the support provided by Kronus. It's super fast. It's a One-click account generator.

Overall - 10/10

No doubt, MineGen.co generator is value for money. I recommend everyone on the forum to get their lifetime memberships now. It's super fast, reliable and easy to use.

I just got a review copy. The site has a very nice and clean design. And you don't have to regist an account on the site to generate accounts, so it makes it really simple to generate some accounts.

I tried 10 accounts and all worked perfect so it is quite clear that he has updated accounts on the site.

Good luck with the sells :) This site looks really nice in my opinion.

I've been using this alot even since I bought it and 99% of the accounts work perfectly.

Great design as well and the favorites tab is a really nice feature.

Definitely worth paying for if you play minecraft, especially on servers where kits are worth a decent amount of money.

I have received a vouch copy of the generator to review and I must say the design and efficiency of the generator is outstanding. When I was first presented with the generator the ease of use was excellent all that is needed is a token to generate unlimited amount of accounts. I have generated 5 account so far and all of them are working. I recommend this to anyone that is in need of a small-large quantity of Minecraft alt accounts. The product is definitely at a reasonable price and if purchased you will not be disappointed.

There isn't much to review about this product as it is just a generator, but here are some points.

[+] Most of the accounts are valid they should last long also.

[+] You have a favorite function what is actually pretty neat.

[+] I like the simplicity of this.

[+] It is webbased so you don't have to download a program.

[-] I really dont like how the security works as you use a token in order to obtain access, those

tokens can be easily bruteforced and used in a other session.

Stashy - December 24, 2015, 6:52 pm

I definitely recommend MineGen for anybody that wants access to an arsenal of premium Minecraft accounts that actually work. Kronus is a friendly guy, and you are easily able to trust him and his products.

Immediately after getting my hands on MineGen, I was greeted with a basic webpage with a very simple design and layout. There was nothing prompting me to login or sign up, no confusing interfaces, no cluttered tabs -- just a simple box asking me to put in a token. After putting in my token, which is much easier than having to constantly log in with a username and password like on most other sites, the page quickly changed and I then saw a single button labeled 'generate'. After clicking this button, an email and password instantly appeared, and I was able to copy and paste them both into the Minecraft launcher and log in with absolutely zero issues.

I really do not see any problems with MineGen at all, and even after generating more than ten different accounts, they all worked flawlessly. I can picture the generator being used to generate accounts to evade bans, duplicate starter items on the servers that offer them, or just to simply trick people into believing you're someone else. The possibilities are endless. There's also a way to favorite any accounts that you generate, which is actually really great in case you lose the email and password to an account you liked.

Easy to use, GREAT PRICE, and fully functional.

'Cynical - December 25, 2015, 12:15 pm

I am leaving a review per the request of the OP.

I was given a vouch copy of this generator, but I am in no one affiliated with the seller.

Upon my vouch copy, I proceeded to generate 3 alts. All 3 alts that were generated were working. They all had decent usernames, too, which was cool. All of the accounts generated are migrated in my experience, but it doesn't really matter, because there's really no need to secure the alts.

All the alts appear to have long-lasting potential due to them being migrated, too, because only someone with the SQ answers could alter account information, meaning the original owners of the generated accounts.

Overall, this is a pretty good looking service, and if you need Minecraft alts, this is definitely someone that I would recommend purchasing from. Plus, at only \$8, what do you have to lose?

Another point to make is that upon Googling, none of the generated alts were found to be in public dumps or anything of that nature. Pretty HQ alts.

Regards,
'Cynical

Vouch, been using this for a while and I'm impressed

squatz1 - January 19, 2016, 3:16 pm

Bought it and it works, big VOUCH from me

Kr?nus - January 20, 2016, 1:11 pm

Thank you guys for vouches! Happy to see you satisfied :)

DemolisherJax - January 20, 2016, 2:20 pm

Are the accounts unmigrated or migrated?

Literally the best minecraft account generator out there, and it's only \$8!

One of the best purchases I've made in a while.

Zekra - January 31, 2016, 8:55 pm

i bought awhile ago, send me my token again?

Kr?nus - February 1, 2016, 3:07 am

@StelioKontos I already gave out enough vouch copied and even if I do more, I'd only gove it to users more trusted than me

@Zekra could you please PM me your previous token or a proof of purchase?

Sahaj - February 5, 2016, 3:34 pm

The new theme and system is pretty good, big vouch!

Thanks Sahaj!

We are experiencing some issues with our system, sometimes it may occur that accounts are not being generated and site's loading slow.

The accounts are private? The accounts are banned from hypixel,mineplex or other big servers?

momeggio - February 20, 2016, 12:46 pm

Sometimes "Can not contact authentication server" and sometimes "wrong password"

Punisha10 - February 27, 2016, 8:00 am

Vouch for Kronus, reliable guy with high quality and excellent service!

momeggio - March 3, 2016, 10:54 am

Ok now some accounts work. Nice

DrJimHead - March 26, 2016, 4:14 pm

generator still alive ?
feedback looks good.

feedback looks good.95% of accs were locked by Mojang, however when mojang wasn't locking accs this gen was amazing

teatime - March 27, 2016, 3:51 am

If this still works and the success rate is 4-6 out of 10 accounts generated then i'd be interested but i can only pay via paypal. can anyone confirm success rate of this?
