Thread: [Krueger 6+ years review of HF.\(added 3+ years\)](#)

Krueger - June 11, 2015, 11:54 am

Spoiler ([Click to View](#)) Kind words from:
Roger Waters.

<https://youtu.be/qmDPWq2XetI?t=181> [Video: <https://music.youtube.com/watch?v=QfpY2bpEw4M>]

Hi, my name is Elliot also known as Krueger. I joined HF years ago ... I joined in 09 because the forum was appealing and it seemed like a chill place to meet new people and such. I honestly never joined HF to learn about Hacking ... As i was already active way before HF was born, i first did ratted and being a skid at the age of 12. I then moved on to coding. I learn how to code in HTML/CSS/VB6. I was just enjoying being able to do whatever i wanted to. I found it useful rather than depending or waiting for others to release what i was looking for. I then moved on to IRC and learn how to do mSL and i developed probably the most awesome IRC Snippet at this moment. It was a Backdoor Status Remote Alias Scripts, I was able to control their status if said victims was writing this in the channel or on his status:(//Encrypted Message) that was writing down a encrypted script in their remote and Alias. I then learn with one of my IRC how to build your Deamon Botnet, it was pretty decent as anti-virus or router wasn't really popular, i remember lol When i was sending a Netbus or Back Orifice bin, like no Anti-virus was popping off and it was indeed backdoored ... That was the era of no crypters. Everything was so much simplier and easy at this time, people were just fooled by anything, P2P Clients like Napster, eMule and Limewire was a big thing too, That was such easy too fool people with your BIN, everyone was looking for new binary(games and latest Keygen ...) I miss this time so much it was so godlike

Oh well, after this i got a tumor and end up in hospital for 4 month, and i survived some how after the operation, i don't know i guess i was lucky ... Those were days and rough time, but i was young ... i did recovered pretty quick. Now it's fine and all behind.

Then i started a semi-professional career in Counter-Strike 1.6 i end up Cevo-Main and CAL-Professional. I played CS for 5 years straight 20-30/Hours a week along with my school. I never did get sponsored or such because i wasn't in the USA and they're was no real sponsor or serious major event so we made our name and reputation Online. This was a serious deal. I took CS like my second Life. It was such an awesome game. My favorite all time team was CoL.

The people who never played CS and started playing CSGo or even Source, can't understand the feeling it is playing CS 1.6 or 1.5 this is so much harder, the recoil, the animation between switch, the walling, the bunny hopping and the long jump along with the double gun boost..... The list goes on man ???

Then i realized how much i was missing computer and Hackforums ... I was in the need of doing a mSL Snippet for our Server to find ringers and scrims in the game it self, so i code a bot with commands. When we were writing down in our CS Server .findringer, then my bot connected to the HLTV was automatically joining and posting in findringer on Gamesurge, when my bot had a PM, he asked Rank/SteamID. When the said user was providing his ID the bot was verifying if the information was valid and legit on legit-proof.com so if so he was given the IP/Port/Ventrilo/Password. It was pretty a nice shit i had there lol. It was saving us time so we could warm up and chill will the bot was doing all kind of commands i wanted him to do. At this exact moment i was like oh my god when was the last time i logged on HF ... Then i took a 2 days

vacation of CS Practice and skipped school. then re-logged on HF to see that Omni was starting to get some serious thing out here. It was the real deal for a public forums and chill member. So i decided to take a shot and became active once more.

Then i started being active in beginner section as question were easy and people were really uneducated ... It hasn't changed i don't post anymore outside of groups ... I feel like the people on most of the section especially on the beginner one don't want to learn ... They want to get spoonfed and be hold by a mentor hand ... There's something i don't get ? How did you first found HF ? You typed and took the time to look on the Internet, how to hack about a certain subject or to do something related too hacking right ? Yes you did and why you can't do this anymore ? Since you join HF you feel like people were your personal army we don't have kids, jobs, school ... I'm not talking about the people who actually take the time to look on HF before posting a question or something that has been asked for 1000 times on HF ... and 10 times the same day. Anyway i just feel like the quality on certain section is below LQ lol. That's why i hand with my offsite buddy and group friends and shit. I will be soon active in the markets i got a lot of projects going down. ?

The first group i joined was Ub3r ... Oh yes i was fucking happy about it lol Like Ub3r was like the Null of HF Group when it came out lol it was so fucking nice, and hard to get ... I got ub3r 3 month after i joined posted around 1.5k post in the beginner and Omni felt that i was okay i guess ?, Then i joined RATs Cr3W it was so damn cool it wasn't active much on HF or in the SF tbh, but we were sharing installs on IRC and Skype every fuckinday i had shit tons of quality stub lol. It was decent Necro was such a good guy, he had some big plans for TRC, but it never did happen, I still chat to him sometimes, he kinda quit HF ... But yeah he's cool guy. The second group i joined was Eminence. When Viral and ShadowCloud were the Leaders, but i got accepted by WiFi and Zach, then they switched Leaders. It was such a decent group to be part of. Like you had a certain post mandatory in the SF but it was not all about this ... We had Coding/Networking Assignment if you failed twice or so you were kicked no exception even if you bought in for 25 bucks ... Anyway i was sad to see disband, but i kept in touch with some buddy's and chill members i met there ? Then i simply took a 1 year straight out of HF to focused on my Networking course that i paid 15k ... I did enjoyed it. I'll tell you how was my first day in class. Oh well i was already a decent user of BT4 ... So i did MITM and DNS/ARP-Spoof all the traffics to my server on the school VM's i was creating for the homework and we were all connected together ... so I just did forward every fucking secretary student in the other room to a fun youtube video :D :D They we're like OMG WTF everyone was amazed how the fuck this could've happen lol. I was laughing with my buddy next to me who he then asked me yo how do i turn on the screen ??? I knew i was in the right spot with some tech savy student. LAWL. I did passed everything and took all possible CERTS they paid me, i was having hard time finding a job because, i was did take it in a private school and i had no government approval or shit like this just my Certificate with seal of my school. They were not so rated at this moment so ... Employers didn't want to risk ... So i then realized fuck that shit man I'm a self learner. I'll make my own business and my own empire and in 10 years ill be rich. FUCK YEAH i was so damn hype i started coding with buddy's of mine stopped all gaming shit ... Then i was decent enough to approach company and offer them a better website and get contract and reputation out of it. I still do it some times but i have more lucrative projects by now. Back to groups and HF :D Well after this i started to see HF was even getting bigger ? So i said to my self how the fuck do people live with HF like SpK(Side note i bought his first Keyloggers to support him now he's in the 400 000 per month with HF)? I started to realized that Exclusive Groups are the damn shit to be part of as you will meet nice and decent users. And have a great time in SF or in Skype :) So i recently Apply to Pirates and it i must say i met some nice and decent People, but tbh this group is a Lounge Group with Quality Users most of them except Auth(This dude always troll/flame in Skype Chat he made me left twice the Skype Chat i won't ever joined it again because of this poor lq user) Well this group is fun to be part of ? Then i recently Applied to Archive. Oh my god where to Begins when i first applied i took 1.5 hour for my application to Adam PM's when i wanted to be in this group so bad man ... I knew Adam was a decend and a great leader good lord i was right i can't talk about

Archive much as it strict and Adam is a rude if you don't respect rules/chill/awesome guy my number 1 member discovery of the year no fucking doubt. I see Archive becoming the next Alliance ?

Then i applied to Echo oh well, I was please to be invited in Hydra seemed to be a cool guy and i wasn't wrong i met some nice people the SF is active not much as pirates but less shits and more funny stuff and dudes no offense to anyone though i just like the group and members in it.

Next goal: Null, Specialist before the end of this year.

Oh well guys i hope you did enjoy my review i might format, make it nice, add more of information this is half of the thing i wanted to share lol , i just spent around 1.5 hours on this writing if i add the time i would've add another 3-4 easily lol. I hope you did enjoy ? Have a good weekend mine will be busy AF ? _____

2015-2018

Well i did get accepted in Specislits when Bull was running the group. I did share some things with them i had great time with them even if i did enter in hospital for the 3rd time ... thats mostly why i got kicked and had no activity what so ever lol.

I wont tell you the reasons but i can tell you that i have a heart of gold im humanist and got sympathy too much for others lol il let you all guess haha its an ez pz one when you dtudy medical field or sector lol.

After this time i had a long break of HF and did learn anything outside of forums that quite appeals me how to make video editing how to use software properly like adobe all bought with my previous student job bcz i was working as a cashier in a restaurant too ... hackers wil understand this part cant tell more publicaly(not sure if wise choosen word here lol) but still i did take a long break of forums and website besides my tech company repairing shop on my own !!! I did make money offline way more than doing other activity ive always felt like i had to do something so i joined a movement as we were united with the same goals and ops were like care about others and give much love to your pire enemy lol it was rough i spent a lot of money in gift cards and clothing and gave them.in exchange of hugs and smile on a complete stranger person. I felt i found my place for sure i was so damn happy with this that i pursui in this optical love and share and all good things happened in my life with no freaking objective or reason behind or in mind not sure if i can tell you the secrets of a positive lives and eliminates vices of your life purify your soul with good drugs like andorphine by doing sports and take a long break of your online activity thats my advice

After that i got back on forums while doing this ... and i felt like hacking wasnt in me anymore hacking human brain was a thing for me. Msking someone smile by giving nice comments on his or her shirts is way cooler than ratting or hi jacking your neighbor wifi with Parrot and Fluxion shoutouts to delta for bringing back linset lolll not sure if its still on git but it saved me time for sure lol anyway after that i did get back on hf to join Superior and i wont talk about its a great group but not suits my goal or t0x3d0 lol well thats it im now moving on with hacking ill be active less on groups outside hf and social platgorm like slaack or the ones were disallowed to fo do so lol i understand Omni about the Discord Rules it such s good complement to irc with webhooks and a nice bot it can kill a website easily lol anyway gg huys had good times being active in groups and SF.

Big S/O to Aura, Viral Dragon, 8Factor, Omni for sure lol,Muvz, eCoLoGy,Shadowcloud and

whoever did help me trough times.

MoonGod - June 11, 2015, 11:59 am

You're a member since 2009. I haven't even read the half of it, will continue reading when I get the time. Seems interesting to read since you're a oldfag member here on HF ?

Krueger - June 11, 2015, 12:01 pm

Hey cool :) Well i'll format the text and make it more appealing and easy too read soon as i am home. ?

Shockley - June 11, 2015, 12:05 pm

That video is so cringeworthy, loool.

Krueger - June 11, 2015, 12:07 pm

Lol yeah but it is good right ?

Roger Waters - June 11, 2015, 12:07 pm

This was a pretty interesting read. Congrats on 6 years of being active on here, quite the accomplishment.

Thank you roger i appreciate it a lot wise word ?

ven0m - June 11, 2015, 12:53 pm

It's been ages since I saw that signature. It brings back old memories. ?

Krueger - June 11, 2015, 2:07 pm

Thanks mate i know i'm not the only one hating me. Even if i'm nice and shit with him . He's not somehow. ?

NoHax - June 12, 2015, 1:23 am

Enjoyed Reading it! Thank you!

Auth Can be a Bitch, But he's Funny When he is mad xD

Thx

virulence - June 12, 2015, 4:15 am

This is awesome man, you are like a HF Grandpa

Charlemagne - June 12, 2015, 7:59 am

Congratulations on 6 years, that was really cool to read.

Industry - June 13, 2015, 12:54 pm

I don't currently have time to read this post, but am very much looking forward to doing so later on today or tomorrow. It gave me a warm and fuzzy feeling in my heart to know that you are still doing well. It's been almost 5 years since we had spoke last, you and necrotoxin made me who I am today.

I honestly can't believe you are still around. I tried to do some searching before to find you but to no avail. I would also like to talk with necro.

Mexican Raider - June 13, 2015, 4:42 pm

I'm glad to see that there's been users here for years.

Livewire - June 13, 2015, 6:08 pm

The number of active oldfags get less and less.

Good to see others around. (:

I played source before I played 1.6, so....sorry, but to me 1.6 sucked.

I went into CAL leagues aswell, just didn't do amazing. xD

Prince™ - June 13, 2015, 7:34 pm

Well, glad to see you still being around dude.

Tea and Crumpets - June 13, 2015, 7:39 pm

You've been on this site since I was 13... feel old yet? Jokes aside that was a good read. I love threads like this where you learn how members started and where they're now. Congrats man!

Happeh - June 13, 2015, 7:45 pm
