Thread: [Being Randomly "IP Banned" \(temporary\)](#)

IntelliJ - June 11, 2015, 10:15 pm

I don't know if other users are experiencing this, but I'll be browsing and I'll navigate to another URL on HackForums and it just says that I've been blocked as if I had a VPN or proxy on.

It happens about once every five or six minutes and lasts for about five seconds. I'll screen shot it as soon as it happens again.

Edit - screen shot.

Spoiler ([Click to View](#))

Metro Boomin' - June 11, 2015, 10:17 pm

It happened to me too, just refresh your page and it fixes it.

I know that fixes it, however I wasn't sure if staff was aware hence why I posted. ?

Roger Waters - June 11, 2015, 10:22 pm

Yup, I've experienced this within the last ten minutes or so. However, it went away after a few refreshes.

-Havoc - June 11, 2015, 10:23 pm

Just had this happen to me, I refreshed a couple times started working again.

Omniscient - June 11, 2015, 10:30 pm

Working on an issue. Please be patient and just ignore the block. Wait about 1-2 minutes and refresh.
