Thread: [\[Free\] 1 year VPS method \[In thread\]](#)

Beeping - June 12, 2015, 8:27 pm

Old thread had too many people and pm's and seeing as the 50 limit thing it's too hard so here is the method. (It's in referall because I used an adf.ly link to shorten the link it's around 500+ characters)

--

Here is card details, for later:

CC NUMBER: 5415 9160 5215 5707

Name on the card: Beep ing

exp date:5/18

(Not a real card so it is not CC fraud)

-

here is the site you need to login/sign up to:

<http://adf.ly/1ImqVg> (I only used the shortened link because the site url was over 500 letters or something)

--

Sign up there, verify phone (You get an automatic call pretty easy you can use google voice)

--

That's it.

Saliksack - June 12, 2015, 10:27 pm

Can i use Firefox in this VPS? please explain the procedure to doit.. or PM me

Beeping - June 12, 2015, 10:30 pm

(Jun 12, 2015 10:27 PM)Saliksack Wrote: [\[CITE\]](#) Can i use Firefox in this VPS? please explain the procedure to doit.. or PM me

Yes, you can. It's very simple just sign up and use that CC and it asks for your number, take the call and put the PIN in and done.

Hash G. - June 12, 2015, 10:31 pm

It's a Window or Linux vps ?

Beeping - June 12, 2015, 10:31 pm

I'm pretty sure it's linux. Might have to double check

vixmm - June 12, 2015, 10:31 pm

You need a real VCC, non-existant ones dont work.

Beeping - June 12, 2015, 10:32 pm

I ordered 2 and got them. I used that card, it worked.

Prince™ - June 12, 2015, 11:05 pm

What's the CVV of the card?

Beeping - June 12, 2015, 11:14 pm

You don't need one for the purchase.

Prince™ - June 13, 2015, 12:10 am

R.I.P it's asking for my place though. GG.

Beeping - June 13, 2015, 12:11 am

Use a fake one. I did :)
Got 3 today

MafiaServ - June 13, 2015, 1:32 am

Pretty blackhat method.

Moreover, you will be required to verify an existing U.S phone number to get a "Google Voice Number", and then use that Google Voice Number and a Fake CC to get the VPS. It's AWS (Amazon), they can easily trace you back, If they want to.

I am afraid most of the members wouldn't find this method useful. Thanks for sharing anyways.

Beeping - June 13, 2015, 1:34 am

Don't need us it can be any number.
I used mine, Australian.

MafiaServ - June 13, 2015, 2:05 am

I am talking about "Google Voice Number", needed to activate the AWS account.

"Google Voice" is available for US residents only.

G???????f????s? - June 13, 2015, 2:13 am

I need a way to remind myself to do this in the morning.

Saliksack - June 13, 2015, 5:32 am

I got one.. Im from India. But it shows Your service sign-up is almost complete!

Thanks for signing up with Amazon Web Services. Your services may take up to 24 hours to fully activate

Limited Edition - June 15, 2015, 11:15 pm

ah, I already knew about this. I had 20 free VPS for 3 months, after a while they'll suspend them since you're not actually paying for them. You need at least \$1 on a VCC / CC to verify there is money on the card to do this iirc. Thanks nonetheless! ?

BLCKBRD - June 16, 2015, 12:48 am

What are the specs of the vps's?

.Satellite. - June 16, 2015, 6:13 pm

It is against the rules to post VCCs on HF.
