What is zero EntryPoint option ? Because if EP is null then the file cannot start mate

Trillium - June 14, 2015, 2:57 pm

Of course you can ;) with a little trick the EntryPoint on PE Header which will be displayed = 000000 it work with a Jmp Command to the Original Entrypoint which is moved in a other code section ?

Changelog New Update:

- Changed Invoke Code now Stub dont use any API Declares anymore ;)

(Jun 16, 2015 01:15 AM)Trillium Wrote: [\[CITE\]](#) Thank you guys for the nice feedbacks just working on Big Update for Trillium Crypt Reloaded 60 % Finish ?

Some of the new options are: Unkillable Process(Kernel Mode(Ring0)) ,Client Updater,You can choose File Extension (*.exe,*.pif,*.com,*.scr,*.bat),Extension Spoofer and much more ?

Im Online if someone need help or have questions ?

Regards

You really got the signed Drivers for it?

Or is it fake.

Incendiary. - June 16, 2015, 3:04 am

One quick question.

Does this have self injection/compatibility with LuminosityLink. IF it does i will almost certainly

purchase it.

Trillium - June 16, 2015, 3:52 am

@W?????

I dont use driver i use a KernelHack which will protect the process make it unkillable (Usermode,Kernelmode)

@Incendiary

When you Crypt Native Files it Inject into self when you crypt .Net files it inject a dropped .Net executable

Update will be ready in some hours ?

I will make some videos when Update is ready showing Unkillable Process and things like that ?

Regards ?

You bought a cert?

or it's an exploit allowing to have valid spoofed certs?

Trillium - June 22, 2015, 2:21 pm

Its no exploit better say i found a way with that you can clone the signature from any signed file and
it will be written @ file that it look valid and bypass for example win 8 smartscreen ;))

Wardow - June 22, 2015, 2:37 pm

will it be valid like there? : <http://prntscr.com/7k4b1d>

Trillium - June 22, 2015, 5:52 pm

Of course when its finish i can do ?

Current Status:

I can put any Signature (32Bit/64Bit) to the crypted file but it looks not valid signature

But for example @ Microsoft Office there is for VBA a exe included called "SELF CERT.EXE" with that you can sign your File with a Trusted Valid Digital Signature the only thing is you must sign it new for every computer where you want execute the Crypted.exe i just debugging this Program @ OllyDbg to find out the Algorithm then i convert it to VB6/ASM, change that part of code that make that you have to sign the file always again and put it to crypter. This Update will be finish next days ?

A cert is not just an algorithm, it must be validated by Microsoft.

And cert that are valid for your own pc are SelfSigned Certs, that mean that they are valid only for your local network (Into your PC), with no Microsoft Database check, for online valid certs it need checks of microsoft

you wont create this.

Trust me certs exist since XP, and if there was an exploit allowing to create signed certs, it would have been created.

Trillium - June 22, 2015, 7:19 pm

Very Big Vouch To me big brother Nice crypter with Unique stub keep it up brov.

BottomNotch - June 24, 2015, 6:54 pm

Vouch 4 this crypter and the coder Trillium. This new update makes this crypter my favorite out of all the current ones I own.

First this thing is FUD:

It looks like an awesome project. Support looks great as well.

I wonder, why isn't it compatible with LuminosityLink. I couldn't find LuminosityLink on the "Compatible with" list in OP.

bbder - July 12, 2015, 2:50 pm

Added you on skype to talk about the crypter.. I'm interested on it!

Trillium - July 12, 2015, 11:40 pm

this product is a full accomplished solution for every software which activity has to be hidden. it has all key features that work simply and steady. i was pretty shocked to see digital signature cloner actually WORKING, adding a REAL tab to any executable-file properties. you should try yourself :)i have to admit ive never had problems with my hwid and licence yet (unlike with other HF products). the coder is skilled, polite and patient person in terms of support and maintaining the product. do not hesitate to buy.

Very satisfied customer here, small stub size, instant execution speed, many additional features.
Very friendly support.
This one is definitely worth the money, highly recommend.

IAmA-GOAT - August 1, 2015, 11:15 am

Vouch crypter is FUD and great, support is probably the best I've ever had. :)

drewkasp - August 1, 2015, 5:38 pm

what is the outputed file language?

Also how compatible with LL and Netwire?

Trillium - August 2, 2015, 1:29 am

Thank you guys for the nice feedbacks !

@drewkasp

How you mean output file language when you mean if it have any dependencies then not because Trillium Crypt Reloaded is completely coded native in VB6 with inline Assembler ?

The Stub size is 52 KB

And yes its fully combatible with LL and Netwire ?

Still FUD ?

This crypter is best FUD crypter in hackforums!
Thanks of selling HQ-products !! :)

papyrus3615 - August 9, 2015, 2:52 am

good crypter and greatttt support.

Thank you bro

Sarge - August 9, 2015, 3:34 pm

Sorry I have been away for a while guys. I will be back a little bit more now. :)

bakasura - August 10, 2015, 10:14 am

A shout out to my man Trillium here. 20 days FUD and still going. Excellent support too. Without any doubt best spent money so far.

DrSpy - August 11, 2015, 3:57 am

Edit:- Issue Resolved. Thank You

Trillium - August 11, 2015, 8:33 am

Edit: DrSpy got his Crypter now and all problems solved ?

Online and ready to handle sells and give support ?

Still FUD ?

New Update Release !

The new Update revolutionized the Crypter Age !

I coded a Polymorphic Storage Method ! The Crypter uses already a unique Storage method and with the new update i modified it to make it Polymorphic ! So on every Crypt the Place/Offset where the Data will be stored is unique ! So no avs cant make a signature again on the Storage method !

Online and ready to give support and handle sells ?

Hope you enjoy the new Update ?

ChangeLog:

- Added Polymorphic Storage Method
- Fixed Small Bug on Eof , Host , Native Compression Function
- Optimized the Startup Function
- Recoded Unique Encryption Algorithm
- Stub is now 4 KB smaller

- Some other small Changes

this guy has the best support available and the crypter is very good quality and crypts just about any executable you throw at it returning a FUD file A++

ATTACKER05 - August 18, 2015, 7:56 pm

Trillium,, your just the best coder I have met here in HF,, great crypter, great support and always making his crypter Fud In every minute of the day, Can't get my hands off this crypter bro.. Million vouches for U.

bakasura - August 18, 2015, 9:45 pm

Most certainly the best support and fastest turn around time for reFUD. A big vouch.

Staid - August 18, 2015, 11:15 pm

Big vouch for this product! Great support great guy!

Dynamo999_eu - August 21, 2015, 1:09 pm

Vouch for this product.. i had a y start with detections on a cutom stub , but trillium was on skype and refuted it.. now testing for how long the custom stub remains FUD but im optimistic since i do not spread nor scan except on razorscanner

He is really serious about his product. having fun testing on my boxes now.

Trillium - August 21, 2015, 1:18 pm

Thank you guys for the nice feedbacks !

The cause of the quick detection rate yesterday was because an idiot uploaded like 25 times on Virustotal i found out via md5 hash now his license is banned and all is stable FUD again ?

Online and ready to give support and accept sells ??

QU?CKSILVER - August 25, 2015, 8:22 am

I've got a few questions that I would love to be answered before purchasing :)

1. Could you please perform a Runtime scan with Avira? but this time, download the crypted file from anywhere. Don't drag and drop/share with the VM. This will make Avira perform a "Cloudscan" on the file. Only downloaded files trigger Avira to do this. (This one is important because in order to infect someone over the internet, they must download your file and it will go through this scan).

2. Do we need execution delay to bypass ESET?

3. Does this crypter prevent AV's from scanning into the process memory?

4. Does this bypass Bitdefender as well?

drewkasp - August 26, 2015, 5:47 am

My crypter won't open...can you come and try to solve this?

Trillium - August 27, 2015, 1:57 am

Hey guys

@DJPunisher

- 1.I testet it it bypass it a video for it will coming soon ?
- 2.Normaly it bypass it without too but to be sure you can use digital signature cloner or Delay execution.
- 3.Yes with the last update it got a automatic antimemory scan engine.
- 4.Of course it does.

@drewkasp

Can you please write me in skype or pm me your details because i didnt got any message from you ?

Great looking crypter, got the files few minutes after transferring the money, big vouch to Trillium and this crypter!

Woland - September 10, 2015, 4:37 pm

all crypted files show error message

does anyone experience similar problem?

Trillium - September 11, 2015, 2:27 am

Thank you guys for the nice feedbacks ! ?

Trillium Crypt Reloaded is still 100 % FUD !

And new Unique Fresh Fud Stubs online contact me via skype or use Update Panel on Crypter to get them ?

@Woland

Do you have Service Pack installed on XP ? and try the new stubs which i released yesterday i fixed a unicode bug maybe that was the cause why you get this error. Try it and let me know ?

Online and ready to give support and accept sells ! ?

Hey guys this is no support thread please contact me for support in skype or jabber !

@personalosas

Thank you for the info i overlook it

@bbder

Contact me in skype and try the new stubs out and tell me which settings you use in skype.

@banned212

I dont want see any word about infecting people or anything similar in this thread you have been warned !

I said to you you need to use no-ip/dyndns to make your ip constant otherwise after every reconnect you have new ip and the servers cant connect.

Here is the new Version of Trillium Crypt Reloaded !

Hello guys sorry for the delay but a thunder storm crashed the power station in my town so i didnt had internet the last days.

ChangeLog:

- Runtime Encrypted Startup Keys
- Better Anti Mem Scan Engine
- Replaced the Patch Engine with a Polymorphic Invoke Engine
- Added New Encryption Algorithm
- Made Strong Runtime Api Hook
- Made the Eof Support Engine much better
- Optimized .Net Support for .Net Files
- Possible to add PE Characteristics 'Relocation Stripped' after the Relocation Table is removed
- Possible to remove TimeDateStamp now
- Automatic PE BoundImport detection and remover

- Optimized the storage Methods
- Fixed small Unicode Bug
- Some other small fixes

Having used this crypter for quite some time now. I can confirm its one of the best in the HF.

Constant update and easy access to support almost 24/7.

I recommend him is you need a quality Data/Application protection against reverse Engineering and antivirus By-Pass.

Bambuf - September 29, 2015, 5:57 pm

New unique FUD Stubs online !

I am online now to give support and accept sells!

@P???ce

Hey of course it work with these files, Trillium Crypt Reloaded support every kind of executable file because it support every kind of storage method (section,eof,resource) + every kind of .Net Engine

The Fud time depend on your spreading level but normaly it should be very long time fud and when you have the "Custom Stub Upgrade" means personal private FUD Stub then you should get never problems with making FUD again because the stubs are daily updated doesnt matter if detected or FUD everytime Update with fresh unique FUD Stubs ?

ChangeLog:

- Advanced Section Settings Encryption
- Removed the Main Type and replaced it with Array
- Recoded the Patch and the Invoke Engine
- Recoded the Encryption Class
- Some other small Changes

Hi, sent you a skype request.

WetPussy - December 15, 2015, 11:52 pm

These guys know how to do business. Easily the best crypter available on the forum and whenever I have a problem both Sarge and Trillium are there to help out. No matter what they'll drop what they're doing and come on Teamviewer if need be. Out of the 6 crypters I've purchased in the last month this definitely is the most high quality product.

And best of all, none of this change icon and assembly bullshit. Just click crypt and your FUD. As easy as that.

Thanks so much guys.

Because of all this Fake Imposters i made a new skype acc here is it:

TDS_Trillium

Please add in future only that ID and please all old customers add this new ID too!

That is my new skype profile:

[img]http://www0.xup.in/exec/ximg.php?fid=10567045[/img]

That was my old skype profile:

[img]http://www0.xup.in/exec/ximg.php?fid=29437871[/img]

The problem is nobody could find me with that name "live:trillium_3" only with "trillium_3" when you search after that name there are to much Fake Imposters.

For example here a list where you can see much Fake Imposters dont trust them!

crypter too expensive, reduce price to get sales

rootjoyy - September 16, 2016, 4:37 am

@Trillium hello bro i have add you on skype you have not accept me. please i need your crypter i want to buy it. i am not a full HF member now please can you accept me in skype thanks is it possible you send me the website to pay from?

ikbeninrotterdam - September 17, 2016, 2:59 am

hello can i talk with you on skype?

fire_bender - September 19, 2016, 11:15 pm

Added you on jabber. Whats the current detection rate for Silent doc?

DrSpy - September 22, 2016, 5:36 pm

I have been a very old customer of this crypter and left many vouches but since last may when i bought for next 3 months after purchase i received the product but never received the support promised with product i waited for many days for Trillium to come online but he alway came online for 5 mints and went offline and those 5 mints comes after 5 or 7 days when you are not able to reply. even after explaining my problem i never received proper support to get my issue resolved and now my product is expired without even single use because of no support and no FUD stub since i bought it.

I am feeling bad to post here because he never come online on skype to provide support and when he did it will be only for 5 mints while your are away.

I am not here to ask for refund or anything i am just here to post my sincere experience with this product. Before my last purchase i have never faced these issues with this product but some how one day things change. Thank you for your past support and product Trillium. It's been a pleasure to use your product but endup writing this review make you realise that never sell a product if you cannot keep up with the support as people paid for it and you promised the support with your product.

Trillium - September 25, 2016, 8:16 am

@rootjooy

Hey i accept all Skype Requests please send me a HF PM with your Skype Name and i will directly contact you ?

@ikbeninrotterdam

Hey I am online now in skype and available for support and questions about the products ?

@fire_bender

Hey i just accepted all XMPP Requests would be nice if you can send me your XMPP Name so i can directly contact you and we can talk about every details. About the FUD Rate it depend on which type of silent Doc you mean Trillium Security MultiSploit Tool v5 include much types of Doc Exploits. And would be nice if you can post in future your Questions in the Exploit Thread ->

<https://hackforums.net/showthread.php?tid=5335859>

Because this Thread is for the Crypter ?

@DrSpy

Hey im very sorry for the current situation and of course we will find a solution and you will get your support im fully back now for support as before i only was the last weeks very busy because of developing new Updates/Programs/Making Tutorial Videos and on the other hand i had to solve some Reallife Things. Now all is solved and as i said im fully back again for Support and Sells Requests im looking forward to talk with you as soon as possible and solve all issues ! ?

First of all i must say i am always impressed with his response and as i explained my issue here he got back to me ASAP and resolved my issue and he is back online again like before to provide

support for his great products it's always been a pleasure to use his products and i must say there is no seller i have ever seen on HF for this long time who kept stable with his products instead like other who sell for few months and disappear. The issues i have been having with crypter are resolved and of course my license is extended. Thank you Trillium for this great product and support. It's time to get hands on his Multi Exploit tool kit which i will be buying very soon :) Good luck for sales.

Buy this product and you will never regret that you have wasted your money on some other shit product. This thing definitely worth buying and pays back you with FUDNESS and SUPPORT.
