Thanks! I used photoshop, I used [this](#) tutorial. [Font I used](#).

To get the text covered by the finger, I used vector masked.

After that, I merged all layers, then I used Dodge and Burn around the text.

Sorry my PM was full.

Wow killer PS skills mate!

Filmski_Kriticar - June 14, 2015, 10:53 am

What version of photoshop do i need to make this? Or which program the dude in the tutorial uses?

SamcoComplex i cant pm you, your inbox is full...
