So you're the guy who pretty much ripped my Scanner? Nice one.

I saw you changed somethings. But first time I saw it even the loading icon was the exact same... and that was custom made for me so yeah..

do you think the abused jspy users could have some free credits if we show payment proof ? i paid a rat 35 dollars who was down one week later..

by the way good luck with it sales , hope customers will not be disappointed again

Dead serious. Go ahead and look at his website. Design, colors, everything the same.

Don't ever trust anything from this guy!

is the colors belong to you? your service even is not like mine , you have 35 AV's and I got 64AV's so do not act like bitches here by saying he got the same colors and the same functions. My website is fully costumed and if I used some colors or the viewing results that's not even stealing because you give the result as Picture and I give them as text and even the rate detection is not the same design too. you even rep me -3 and I did not give you the same because there is no reason to do that and I don't have any issue with you and we are adults here not damn kids.

Also, most of the designs is on the internet as open sources ! you want to make open sources belong to you too? WTF ? Act like adults and show some respects if you don't mind

Is it working with Cyborg keylogger it's created using Visual Basic .Net?

joeing777 - September 5, 2015, 12:39 pm

does this still works? someone let me know pls.

slimboy360 - February 17, 2019, 2:43 am

can this crypt .exe or just vbs?

You dug up a thread from years ago, why would you do that? Just search into this section for more recent crypters, jeez
