I really want a "digital looking" logo. Let me see what you can make.

Please ask questions!

Thanks!

EDIT: The logo needs to be a "D" & "B" but with a digital look. You don't need to add the text, just recommend a good looking font that would go great with your logo! Credit will be given on the website.

How does this look? Feel free to PM me feedback, as I probably will forget to check back to this thread.

If you like it, I'll crop it to your requested 800 x 600.
