Thread: [\[Simple+Basic\] Create your own high success dorks!](#)

Beeping - June 15, 2015, 3:02 am

For this example, I'll be going for shopping dorks.

First off, you need the inurl: bit which tells the dork to search domain url's for what you enter.

Code inurl:"There, you need to write a random but mainly vulnerable php/asp code.

Here are some examples:

Code .php?cid=

.php?show_thread=

.php?cat=So here is the code:

Code inurl:".php?catid="What that part does, it tell the dork to search for ".php?catid=" in the url.

Now you need a space, and another inurl:" quote.

Code inurl:".php?catid=" inurl:"In the second "inurl:", you put in a word. For this example I will use the word "ipad".

Code inurl:".php?catid=" inurl:"ipad"What this does is find a bunch of url's, mainly shops/information sites with ipads.

Running that dork, here are a few sites I got:

Code http://www.planet.co.th/th/product_detail.php?catid=4&catsubid=43&id=326

<https://www.kit.edu/markt/showinsertion.php?catid=1&page=5>

rissa007 - July 27, 2015, 3:10 am

thanks for this im learning to make my own dorks

Neos07 - July 27, 2015, 5:55 am

Thank you Fantasized, very useful!

blakmoon - August 31, 2015, 3:46 pm

i found some sites injectables..thanks for the help
