Thread: [retrieving deleted facebook messages](#)

everythingisfinite - June 15, 2015, 2:14 pm

Hey everyone,

Does anyone have any ideas on how to recover deleted facebook messages, perhaps using graph API? I searched the forums already and found a post where m4dh4ck3r says he put up a tutorial, but I could not find it.

I cannot do the obvious thing which is ask the person whom I had the conversation with to send me the messages unfortunately. thanks.

Gee4rce - June 15, 2015, 6:06 pm

Graph Api was a nice idea, but this will not work ?

There is a function though to download your full profile data as a .zip file, it may be contained in there.

There is a lot if you use search, maybe someone is there with a solution, and it also should contain the tutorial you mentioned: [Link here](#)

Greetings, Gee.

Thanks for the reply and the link Gee. I actually tried downloading the profile data and unfortunately this doesn't include deleted messages. I've had a look a few times now in the search results as well to no avail. I'm sure there must be a way but it is probably known to very few.
