FAQ

Frequently Asked Questions [\(Click to View\)](#)

Q. You're a new member, why should we trust you ?

A. Because you have no reason not to, you can test my site out and you can even buy 10 bots with your BTC unlike other manual ones. I'll build my trust and credibility as the time goes on though :)

Q. Which bot do you use and how many bots do you have ?

A. Sorry but I don't intend to disclose that. On that note don't put ridiculously large no. of executions like 10,000 :P

Q. For how long your site will be up?

A. I have no intention to shut this site down and it's perfectly safe to visit the site as your IP isn't logged :)

Q. Any Vouch Copies?

A. No vouch copies since you can buy bots as low as 6 , like literally and have it delivered instantaneously.

Q. Can I ask for a refund ?

A. No refunds. You pay for the executions and not what you get, with that said I'll try to satisfy in any way I can!

Q. What type of links are supported ?

A. Only direct links without SSL are supported !

I tried your site and it looks cool! Got around 70% with .net file.

Cullen's Review

Ease of use 9/10:

For anyone experienced with Bitcoin, this is one of the simplest processes you'll ever go through. There is just one issue, when I received my bots, and paid, it still says the payment is unpaid on the order screen, which can confuse people.

Speed 10/10:

As soon as I paid, the bots came INSTANTLY. There was no need for bitcoin confirmations, it just spammed my computer with notifications of new installs!

Why do I like it more than manuals?

I will definitely be using this for all of my bot purchasing needs. I like this a lot more than manual shops because you don't have to wait for them to be online. You can also buy as little as you want! Say you're just getting into RAtIng, and you need to test with only a few bots, this is perfect for you.

Overall 10/10:

I gave it this rating because it's fast, efficient, and a lot better experience than manual bot shops. Good work OP!

Well, I don't need any proof to make you believe, its your wish. And I won't take any names of the boards that I am on. But for sure I am not Whitecore or a multi-accounter. ?

And FYI, I had an Intro thread when I joined HF (which is now deleted, idk why). Ask the members who +repped me :)

Also, you can ask every coder here on HF about who coded this website, I'm sure you won't be able to come up with a name cuz its me :D

Yeah, that is absolutely fine but just make sure your file size is less than 600-700kb though that is pretty large too but whatever and use a private file hosting so that your file isn't blocked even before its downloaded, by the av's.

If you've anymore questions feel free to ask.

Can you check the execution rate of your custom ddos bot please ? Being FUD doesn't mean that you'll get a "good" execution rate.

THERE ARE SO MANY FACTORS THAT CAN RESULT IN NON-EXECUTION OF YOUR FILE, literally sooo many!

But that's a pretty horrible execution rate, you should get your bot checked first + being executed on 1 machine doesn't mean that it will automatically execute fine on the other.

People are impossible to be pleased with anything, it's in human nature, you can't change that. Please don't post off-topic.

As for autobotshops, I think I am doing a pretty good job at it and no it's not a waste of time, it actually saves time.

Currently in the process of purchasing 100 bots... we'll see how this goes.

It's supposed to be instant, and I may have gotten 5 bots in a 15 minute time span, and 3 of them disconnected quickly. I purchased 100 executions. My execution rate on torrents/youtube/other similiar methods is upwards of 90-95% because my file downloading site logs IP's/locations. However, I don't want to flame the post, I'll simply contact the seller.

Loaded more bots and replied to your PM as well.
HF was offline as well.

(Jul 3, 2015 12:07 AM)Stealix Wrote: [\[CITE\]](#) Currently in the process of purchasing 100 bots... we'll see how this goes.

It's supposed to be instant, and I may have gotten 5 bots in a 15 minute time span, and 3 of them disconnected quickly. I purchased 100 executions. My execution rate on torrents/youtube/other similiar methods is upwards of 90-95% because my file downloading site logs IP's/locations. However, I don't want to flame the post, I'll simply contact the seller.

So your download site must've logged how many times your file got downloaded right ? Check on that.

Edit : Nice detection rate you got on your file right there :

You're flexing on the internet, calm down. You have a terrible understanding of english lmao... when I spread my stub via youtube/torrents I upload the file to a site that records IP's, so I know that my success rate is easily over 90%. As I stated before when I sent it, the file was 2/59 on Razor's scanner.. talking shit about my file is only going right at him ?

best think is to get a shelled server.

you can use :

but you will have a bad execution rate because the domain is detected.

You use someone else's script to delete YOUR server logs ? ???

Apart from flaming I would like you to learn some coding first and make a bot which actually works and yeah go ahead make a community alert/scam report proving that I'm a scammer (which I am not otherwise there would be a ton of scam reports on me by now).

If you're too poor to spend \$2 you might as well log out from this site and never log in again. Any further posts will be reported which are not acc. to HF rules. Ty.
