Hey man. Can you crypt a botnet?

Thanks.

BahNahNah - June 17, 2015, 4:19 pm

What crypter are you using for this?

SourMan - June 17, 2015, 4:23 pm

If your using a crypter, becareful that ur not breaking their ToS

Are you using a HF crypter to do this?

In that case this service is not legal since you can get banned from that service for doing this.

If not what encryption method are you using?

Why is your service better than the trusted free crypters that used correctly will turn your bin into a FUD bin?

Why would you sell "long lasting crypts" for \$2 only? Is long lasting 2 or 3 days?

I'm sorry but you give no information about your crypting service that all those questions prompted instantly after seeing the thread.
