I watched the video but can't tell what's going on. Are you exploiting the fact that you're in a member's area on a free world?

You go on the boat in a members world, get them to hop f2p without knowing, they drop, go off boat, rip their item.

As far as I know a few billion has been lured with it since I uploaded it.

This isn't really a bug, I got into creating lure methods for a while. Isn't much money in it though since 99% of the luring community are so dumb lol.

Nice technique but like you said it's not the best lol. People would have to be pretty dumb to fall for it.
