Thread: [Email with attachment in Vb.net](#)

Strintent - June 17, 2015, 8:54 am

I know most people know how to do this but i looked for a way to do it when i first started vb so im posting it here.

How to email with an attachment:

Code Imports System.Net.MailGmail:

Code Dim Mail As New MailMessage

Mail.Subject = "Subject"

Mail.To.Add("To email")

Mail.From = New MailAddress("Your email")

Mail.Body = ("Main text")

Dim attachment As System.Net.Mail.Attachment

attachment = New System.Net.Mail.Attachment("Path to file")

Mail.Attachments.Add(attachment)

Dim SMTP As New SmtpClient("smtp.gmail.com")

SMTP.EnableSsl = True

SMTP.Credentials = New System.Net.NetworkCredential("Username", "Password")

SMTP.Port = "587"

SMTP.Send(Mail)

Hotmail/Live:

Code Dim Mail As New MailMessage

Mail.Subject = "Subject"

Mail.To.Add("To email")

Mail.From = New MailAddress("Your email")

Mail.Body = ("Main text")

Dim attachment As System.Net.Mail.Attachment

attachment = New System.Net.Mail.Attachment("Path to file")

Mail.Attachments.Add(attachment)

Dim SMTP As New SmtpClient("smtp.Live.com")

SMTP.EnableSsl = True

SMTP.Credentials = New System.Net.NetworkCredential("Username", "Password")

SMTP.Port = "587"

SMTP.Send(Mail)

Only3 - June 17, 2015, 9:06 am

3 TO 1 Mail.Attachments.Add(New System.Net.Mail.Attachment("Path to file"))

^^

Dim attachment As System.Net.Mail.Attachment

attachment = New System.Net.Mail.Attachment("Path to file")

Mail.Attachments.Add(attachment)

I remember having an issue with GMail back in the day doing something like this... This will help people I'm sure so thanks for the share ;)

Strintent - June 18, 2015, 4:40 am

Nice hope I can help :) I had the same problem

Assigning a string to an int property, and you're releasing a source? u kiddin?

Strintent - June 18, 2015, 12:54 pm

Well if it works it works and it does so no im not kidding

Odus - June 18, 2015, 12:59 pm

It won't compile with Option Strict on. He does have a point though. The port property is expecting type integer yet you're initializing with a string.

Strintent - June 18, 2015, 1:01 pm

How would i change this then?

Odus - June 18, 2015, 1:02 pm

Remove the quotation marks. It's that easy!

Strintent - June 18, 2015, 1:04 pm

Oh okay makes sense thanks :)

Got to wait 24 hours to update the thread :|

GreyPhantom - June 20, 2015, 1:32 am

This is a SMTP Email modded version. XD
