I can definitely vouch for my friend 1k here. he asked me if i'd any spare Skype account to test his method. as i didn't have one, i went ahead and made a new with proper details and email as well. he asked me to give me 5-15 mins, and then boom!!! I reload my account page on Skype's site and lo behold, it says that my account is suspended. he got an account that i'd just created around 30 minutes ago banned/suspended in a few minutes, i was surprised, in just minutes!!! then he asked me to try and see if retrieve me account. i went on with the procedure. Skype emailed me with details as to how to retrieve it. i followed up and what do i see, a form with 30+ questions that need to be answered as accurately as possible for me to recover the account. considering not many people ever remembers such intricate details and all, i'm pretty sure the people who get banned won't be able to get their skype back...

This isn't a buddy vouch of a fake vouch. this did happen and i did see it all happen. His service is really legit and the ban happens in minutes.

A huge vouch for the big guy here. definitely worth using his service!

Good luck with sales brother!

Only 1 thing is bothering me in your thread, which is this statement.

The problem I have with this statement is that Skype Support often responds very slow in my past

experiences with them. They usually take 12 hours to reply but sometimes even take 72 hours to send a reply. On top of that they ask for several other details after sending the very first recovery request (that is if most information is correct).

My question here is, what would you do if the account was recovered within let's say 7 days?

Great question

I have changed it to 72 hours. I can no give a full refund any time after that. Since Skype states WITHIN 30 days from an account being canceled/closed/ban that someone cant recreate that same account name.

Thank you sir. 72 hour refund is now in effect!

No it is not that method.

Skype live chat method requires you to have the Skype users email address and have access to that email address, because their support sends you a code to that Skypes email address to prove you actually own the account.

*If you had their email address and was able to log into their email address, then what would be the point of banning when you could simply JACK their Skype...

Either way

It use to work a couple years ago, but was quickly patched.

If you know of a way to ban Skypes, bro then open up your own service.

and

Also it's 50% off at the moment

My method is a very unique method which has still yet to be patched

This method is not the public method, that is why they buy it.

DaUB3R - July 18, 2015, 2:48 pm

People claim it's public, however I've never seen it. Vouch for 1000's great service.

I vouch that 1k can do this in a matter of minutes and this is no public method. ?

Thank you DaUB3R

Due to a couple very low quality members, thinking that my method is the public method. I will simply explain the PUBLIC methods.

You can get a group of 20+ people to report the user over and over until they are ban. Which takes 24 hours to ban.

You can also make a Skype account similar to the persons you want ban. Then make threats and harass yourself. Then contact Skype support and show the chatlog. Which also takes 24 hours to ban.

MY METHOD IS NOT THE PUBLIC METHOD AND I CAN BAN IN MINUTES.

I hope the information above will keep the low quality, butt hurt, jealous members from sales trashing.

Can't they just make another account in just a few minutes?

Yes they can, but if they did not save all their friends or use Skype for business or whatever they can not gain access to that account again.

I'm really happy to see that you're making sure that this doesn't effect HF community in a negative way.

Good luck with your sales man!
