Thread: [Official Group Debug \[Coders + Teachers\] Recruitment](#)

Nex+ - June 17, 2015, 10:02 pm

Welcome to Debug's recruitment thread. For this phase of recruitment we are looking for teachers. Ones that can teach in the below fields. If you are qualified than feel free to apply using the coded format at the bottom of this thread. You will be given projects and they must be done on a deadline to ensure your stay as a Debug member. I can't express this enough, put time into your applications, showing us that you put time shows that you will put time into our group and are not just looking for a userbar. Good luck to all that apply, do not message any leaders regarding your application or you will be denied.

How much time do you have on your hands:

Sir - June 17, 2015, 10:04 pm

Name: Starstruck

Age: 25

What languages are you familiar with: vague knowledge in PHP

Your past work: None

How much time do you have on your hands: A lot.

Note: I'm applying because I want to learn more about PHP and Java. Pretty much a noob at it, eager to learn and I learn quick.

TRH4CK - June 17, 2015, 10:05 pm

Name: TRH4CK

Age: 17

What languages are you familiar with: VB.NET | PHP

Your past work: [Youtpop \(My own site, currently offline\)](#) | [Leadaxy](#) | [UnrealSMS Panel](#) | I have some other projects, that I'd rather not post in public, but I can absolutely show in private.

How much time do you have on your hands: Currently about 12 to 14h a day.

Thanks!

c x y k - June 17, 2015, 10:12 pm

Name: Kondax

Age: Fourteen

What languages are you familiar with: I'd like to teach members PHP.

Your past work: I don't really have any past, public work. You can take a look at me helping in the PHP section, or you can wait for my PHP product to be released. That's about it, for now.

How much time do you have on your hands: Few hours every day, depends on the day.

zSerity - June 17, 2015, 10:14 pm

Good group full of knowledgeable people.

Harbo5 - June 17, 2015, 10:20 pm

Name: Harbo

Age: 26

What languages are you familiar with: Java is my best language, but I know a few others to a decent degree

Your past work: All closed circuit or for classes when I was in college, haven't done anything on HF.

How much time do you have on your hands: Not a lot, I have a fulltime job.

'Axel - June 18, 2015, 4:25 am

Name: 'Axel

Age: 17

What languages are you familiar with: VB.NET / PHP / HTML (Did some MyBB & vBulletin work in the past also)

Your past work: None| Finished some but never released.

How much time do you have on your hands: 24/7 until college in August.

Digital™ - June 18, 2015, 4:40 am

Name: Digital™

Age: 29

What languages are you familiar with: VB.NET, HTML, CSS, PHP ;) Spanish, Swedish, Welsh & English

Your past work: <https://hackforums.net/showthread.php?tid=4868582> and White Hat Support Daily.

How much time do you have on your hands: Im online about 8-10hrs a day...depends if you need me

Also things to add. Experienced with Graphics, Video & Music Tech (what im qualified in)

StackAttack - June 18, 2015, 5:01 am

Name: StackAttack

Age: 15

What languages are you familiar with: I'm most comfortable with C#, but I also know NodeJS, Java, and Php.

Your past work:

[This is a Twitch Chat bot I'm currently working on in C#.](#)

[This is a simple chat app written in NodeJS](#)

How much time do you have on your hands: I've recently dropped out of school. So lots.

Astute - June 18, 2015, 5:02 am

Good luck to all members who submit their applications.

Debug is planning something BIG, and I'm pretty sure you all would want to be a part of it.

Velocity™ - June 18, 2015, 5:12 am

Name: GoEncrypt

Age: 17

What languages are you familiar with: HTML, CSS, VB.NET, C#

Your past work: HWID Grabbers and HWID Protector for .NET Applications, API usage, Login Systems, My School Project Site: (<http://thedarksaviour.my3gb.com/>).

How much time do you have on your hands: ALL THE TIME! (Im not exaggerating, Im on from very early in the morning on Saturdays and Sundays and I', om till very late in the weekdays.) I have no life.

Thank you and good luck to others.

Java. - June 18, 2015, 5:19 am

Name: Java

Age: 6071 days

What languages are you familiar with: HTML. Learning JavaScript & VB

Your past work: None.

How much time do you have on your hands: More then enough.

Epicur - June 18, 2015, 6:57 am

Name: Ragnar Lodbrok

Age: 19

What languages are you familiar with: Java, PHP, HTML & CSS, C, Assembly and some Javascript (ordered by knowledge level)

Your past work: Well most of my work is offline. I did an instagram project a while ago with Java, where you could apply Blur to some images, make them pale etc.

I also did this inclined planes generator, nothing fancy but it is made with Canvas, HTML5 and Javascript and they are a bunch of lines writing over and over. That was my high school project 2 years ago.

How much time do you have on your hands: On monday I finish my exams and I will have like 5h a day to devote to my new computer.

Aakash_Choudhary - June 18, 2015, 8:38 am

Name:Aakash Choudhary

Age:23

What languages are you familiar with: HTML/CSS,JS,jQuery,C,C++,PHP,MySQL

Your past work:None. But i have made some projects in my own localhost. Plus I made a lab which is still unfinished :- lab.cyberteamrox.org

How much time do you have on your hands: A lot

I am learning security in PHP and i am joining this because i want to expand my knowledge and if anyone need help i will try my best to help.

Thanks

deiski - June 18, 2015, 8:42 am

Name: +Cyan

Age: 16

What languages are you familiar with: Advanced VB.NET and Python.

Your past work: (I think you know the extent of my knowledge, if not PM me).

How much time do you have on your hands: Just finished my course so now I have all the time in the world, on 15-18 hours a day.

iReFuSe2LoSe - June 18, 2015, 9:50 am

Name: Hero

Age: Old enough to be your big brother

What languages are you familiar with: Visual Basic, Visual Basic 6, HTML, (Plans to learn C++ n C#)

Your past work: Been a while.

How much time do you have on your hands: I work and party so not much, but we do business together on the side.

cyberducky - June 18, 2015, 10:02 am

Name: Abide

Age: 17

What languages are you familiar with: HTML, CSS, PHP, JS, C#, VB.NET, Java (Beginner), C++ (Beginner)

Your past work: N/A - Haven't really created much

How much time do you have on your hands: All summer pretty much.

??? -? ? ??? ??? - June 18, 2015, 11:45 am

[Data Crawler || Harvest tons of E-Mails in moments || Earn \\$\\$\\$ through Spam!](#)

Also I coded many websites. Some were Forums, others were unique Ideas I had but stopped working on. I can't give any link but of course I can proof my work anytime. ?

How much time do you have on your hands

Since I have a wife & kids sometimes more and sometimes less, currently ~4-6h per day. ?

Nex+ - June 18, 2015, 3:14 pm

Going to review some applications later today, those who get accepted will get a message from me.

+One - June 18, 2015, 3:46 pm

Guys spend a good amount of time and make sure the application looks good before posting. Good luck to everyone who's applying. Debug is an awesome group with many awesome members and a good owner.

Nex+ - June 18, 2015, 3:48 pm

Just sent out acceptance invitations. If you did not get a message from me, feel free to reapply

'Axel - June 18, 2015, 4:12 pm

*My re-application

Name: 'Axel

Age: 17

What languages are you familiar with:

HTML

PHP

VB.NET

C++ (Taking a course now)

Your past work:

None yet but working on a bot, getting help from some debug members.

How much time do you have on your hands:

All day long.

Ang?I - June 18, 2015, 6:09 pm

Name: Angel

Age: 21

What languages are you familiar with: Java, Python, C, C++, C#, ASM

Your past work: Third year CS student

How much time do you have on your hands: A good amount after I finish up summer courses in the next week

JavaProfit - June 18, 2015, 10:07 pm
(Re-application)

Hi, I'm Systemic.

Age? I have 16 years.

What languages are you familiar with? I am most familiar with the Java language. I have been writing applications with it for several years to this date, and enjoy doing so.

I furthermore am familiar with Python, although I do not use this language as my primary.

I am currently learning C in order to write more low-level programs, so I must count that as a language I am familiar with.

.NET languages such as Visual Basic are ones I am vaguely familiar with, yet I do not consider myself to "know" those.

My past work? I have a GitHub account that I used to use for simple projects. This can be found [here](#).

I am currently developing a utility for Skype, and you may feel free to PM me for details or code. This is a great way to see my latest private code and abilities.

How much time do I have on my hands? I am available in the late morning and into the night on weekdays and weekends during the summer.

For time reference, I live in the United States.

Ventures - June 18, 2015, 10:12 pm

Very excited to see some new students and mentors come in.

On another note, I think Systemic would be a great addition to Debug. He's motivated and hardworking, and he knows what he's doing.

Good luck to all the applicants!

Th3PonyWizard - June 19, 2015, 1:51 am

Are there any actual benefits for being a teacher?

Nex+ - June 19, 2015, 1:55 am

(Jun 19, 2015 01:51 AM)Th3PonyWizard Wrote: [\[CITE\]](#) Are there any actual benefits for being a teacher?

Expand your knowledge with the rest of the community, and you will be paid, by me.

Also, if you have to ask that question, I don't think this group is for you.

0m1cr0n - June 19, 2015, 3:48 am

Name: 0m1cr0n (But I guess I can say my real name. It is David)

Age: 22

What languages are you familiar with: Python, C++, Java, JavaScript, Basic, CSS, HTML, PHP and SQL

Your past work: Really not anything to show off. I mean I'm a grey hat hacker and I've worked on some black hat things as well as some white hat things. Programming websites, hacking websites. Programming games, hacking games. Programming programs, hacking programs. You know the rest. Also made a couple of Keyloggers, RATs, Malware and Bots. Even once experimented and made my own OS. It was a new type of Linux. I called it Linux Flex. Never really got out but still I liked it and I worked on it.

How much time do you have on your hands: Now since it's summer I am available literally 24/7. During the work year I am free about 6-9 hours a day. On holidays I'm free 24/7 too.

Looking to learn and teach.

Hope I am accepted. Love this group. ?

Anxuein - June 19, 2015, 12:16 pm

Anxuein

Age: 20

What languages are you familiar with: I'm just going to list the ones I am confident with to begin with:PHP

Python

Javascript

SQL

HTML (everyone knows this though, lol)

I do know a bit of some other languages where I've dived into them previously, including NodeJS, C++, C#, bash

Your past work: <https://bitbucket.org/Anxuein> / [Getting into Python](#) (only Python, but refer to my posts)

How much time do you have on your hands: From when I get home from work which is around about 4PM-12/1AM (Monday-Friday), usually most of the say on the weekend.

Note: Even though I've not posted much lately, I'm becoming more active in the coding sections as of late since I'm settled in my job. I mainly post in coding sections moreso now, though.

Rokushi - June 19, 2015, 12:40 pm

Name: Hunter

Age: 17

What languages are you familiar with: Html, javascript, learning c.

Your past work: some Userscripts, nothing special

How much time do you have on your hands: say about 10hrs

-Buck- - June 19, 2015, 12:44 pm

Name: Buck

Age: 21

What languages are you familiar with: Java > Python > PHP

Your past work: CL email scraper, Algorithm Analysis (searches and adds), CPU simulator, and a Cyclic Redundancy Check program. I'm happy provide my Github with these projects privately.

How much time do you have on your hands: 2-4 hours daily

perilperilperil - June 19, 2015, 1:15 pm

Name: Call me Gang.

Age: 16

What languages are you familiar with: Intermediate knowledge of Java. A VERY quick learner and

i mean that; i am willing to try and accomplish any project given to me, it just takes me only a tiny bit longer as i usually take a while when i code anything because i have to think about it thrice. I can easily learn C# as well, just starting out with Java because i prefer it. Not a big fan of C++, but i can and will learn that in the future as i progress in game hacking. Any game hacking that i attempt to do, is in C#. I know Basic python as well.

I've been looking for something like this because i find projects pretty fun, and given proper motivation i can and will accomplish anything that is requested of me

Your past Work:

A simple runescript mining script: For Tribot (Not too advanced: Mined the closest rocks around you, ran to the bank, and banked it.)

DayZ SA Hack: Wrote a radar when a memory class was available but have stopped, now that they have added a kernel driver. I've been trying to figure out how to sign a driver and get past it :)

Minecraft server plugin: Wrote a quick plugin for my parter and I that notified everyone when we logged in, in a cool and pretty color

How much time do you have on your hands Literally all day unless i'm working out, out with friends, and or learning more :)

b?xxy - June 19, 2015, 1:17 pm

Name: BoxyBabee(with two e's)

Age: 19

What languages are you familiar with: Semi Java, vb.net, PHP, HTML, piglatin

Your past work: I've coded plugins for Minecraft servers, and had my own personally coded website with cool little features I guess.

How much time do you have on your hands: I'm on HF 24 hours a day, since I work at a computer.

Nex+ - June 19, 2015, 8:16 pm

Seen a few applications that caught my eye. Will be sending out more invites this weekend.

Lrrr - June 19, 2015, 9:26 pm

What languages are you familiar with:

PHP, Python, Ruby (on rails), and JS

Your past work:

In real life I am a Sr Devops Engineer with over 10 years of experience with Systems Administration and LAMP/LNMP environments.

How much time do you have on your hands:

Actually, not that much... but I still have enough freedom to make time for fun/interesting side projects.

Lambasoft - June 20, 2015, 12:11 am

Name: Ayman

Age: 21

What languages are you familiar with: PhP / HTML5 / CSS3 / MySQL / Javascript / VB.net / C++

Your past work: You can find my portfolio online at: <http://www.aymanabiaoun.com/>

How much time do you have on your hands: I usually am always working on a project or two, but I can always set my priorities. I have my life dedicated to development.

Vohrex - June 20, 2015, 7:23 am

```
public class debugApplications {  
  
    private void vohrexApplication() {  
        String name = "Vohrex";  
        int age = 11+name.length(); //Seventeen

How much time do you have on your hands: Im online about 8-10hrs a day...depends if you need me

Also things to add. Experienced with Graphics, Video & Music Tech (what im qualified in)
I know this user has already been accepted into debug, but I am also going to throw in a vouch for him. When I do malware removal for infected machines for people I know, I use your tool for ease of access.

rxki - June 21, 2015, 7:39 am

Little curious, if someone isn't really knowledgeable in programming, can they still apply if they have a great interest in learning a couple languages?

Nex+ - June 21, 2015, 7:49 am

(Jun 21, 2015 07:39 AM)L?ki Wrote: [\[CITE\]](#) Little curious, if someone isn't really knowledgeable in programming, can they still apply if they have a great interest in learning a couple languages?
There will be a student recruitment out in 2 weeks ish

0m1cr0n - June 21, 2015, 12:17 pm

Quote:There will be a student recruitment out in 2 weeks ish
Yo so did you send those PMs? Just to know if I got in. ?

CatSoup - June 21, 2015, 12:55 pm

Name: CatSoup

Age: 17

What languages are you familiar with: Java, VB.NET, Python

Your past work:

Email Checker (VB.NET) -

This little program goes off of a .txt file containing email logins for certain providers like Yahoo, Google, AOL, ect. It goes through all the emails in the inboxes of all the accounts on the .txt file, and checks for keywords in emails. It then downloads the email and converts it to a .txt file and puts all the emails in that folder in a directory.

Screenshot of it:

Spoiler [\(Click to View\)](#)

Minecraft plugin development (Java) -

I worked with minecraft plugins for years and I got really good at it. I made several minigames that took weeks to develop. Made a quite bit of money doing private development work. If you would like to see some of the games I made within minecraft with Java let me know and I can setup a private server with some of the plugins I coded.

Here is my bukkit dev page:

<http://dev.bukkit.org/profiles/AlreadyCoded/>

How much time do you have on your hands:

A lot.

I have no school and no job right now, most of my time is dedicated to programming jobs or playing league haha.

Knight? - June 21, 2015, 6:07 pm

Name: +Harm

Age: 21

What languages are you familiar with: I am familiar with CSS and HTML. Though I want to become fluent in PHP, Javascript, and then learn Javascript. I really want to get familiar with bootstrap and coding my own theme in WordPress. I feel as though there is a large amount of money to be made with custom WordPress themes, and also editing them. I have Graph design experience and really wish to take my web development skills further.

Your past work: At them moment I have no work for the reason above. I see this group as a gateway to my development and expanding in the knowledge of web development. I really would appreciate the opportunity if you were to accept me into your group.

How much time do you have on your hands: More than 78 hours a week. This includes nights, and weekends.

SLY - June 22, 2015, 7:32 am

Name:SLYjnr

Age:17

What languages are you familiar with:c++,HTML

Your past work:Nothing really

How much time do you have on your hands:Plenty!

iReFuSe2LoSe - June 22, 2015, 10:10 am

Name: Hero

Age: Old enough to be your big brother

What languages are you familiar with: Visual Basic, Visual Basic 6, HTML, (Plans to learn C++ n C#)

Your past work: Been a while.

How much time do you have on your hands: I work and party so not much, but we do business together on the side.

Kody?? - June 22, 2015, 10:52 am

Name: Kody

Age: 20

What languages are you familiar with: HTML & C++

Your past work: ive made a few websites but they are dead now. Ive also coded a few jtag patches from back in the day, if you are interested in seeing them. Pm me.

How much time do you have on your hands: alot.

Sajuuk - June 23, 2015, 6:27 pm

Name: Sajuuk

Age: 17

What languages are you familiar with: C++, Lua

Your past work: I can upload a profile with archives of my past work if need be.

How much time do you have on your hands: For this Summer, enough for me to be able to model three-dimensionally and texture those models, implement them into the game (Lua), and create a short utility program that imports the final hardpoint-object data into the main data archive (C++).

Notes: I have limited internet access at my house, but occasionally get decent access. (Fast enough for me to upload large images and/or HODs to my data page/archive.)

BadLuckLately - June 23, 2015, 9:05 pm

Name: HateSchool

Age: 16

What languages are you familiar with: HTML

Your past work: I have done nothing besides make a website for my shitty computer class.

How much time do you have on your hands: I have no life meaning I have from dusk and dawn. I take a shit every 3 days and a piss every 4 hours. That means I have more time than everyone else on this forum. I sit around all day playing shitty videogames and waiting for a hot random girl to text me saying hey you wanna meet up. Everyone else I know is driving cars and going to parties. My broke no car ass is stuck at home. To sum it up I have all the time in the world.

Nex+ - June 24, 2015, 8:12 am

I'll be sending invites out this week again

Musketeers - June 24, 2015, 11:25 am

Name: Gabriel

Age: 18

What languages are you familiar with: Java, VB.Net, C#

Your past work: I've worked with openCV, website crawler, lot of malware related programming , Socks5 Integration to use Tor over C# + portable tor embed in it. Hex reconstruction file transfert, etc.

How much time do you have on your hands: Too much time, but I want to have a direction where to head because I'm lost and without much idea and I just need an idea to code ?

Sahaj - June 24, 2015, 3:56 pm

Name: Sahaj

Age: 16

What languages are you familiar with: C++, Learnt HTML/CSS last year.

Your past work: Nothing much, I am learning as much as I can, want to master C++.

How much time do you have on your hands: I spend more than 10 hours a day on my computer.

Delirium™ - June 24, 2015, 7:22 pm

A brief note

I am a big fan of Debug and I believe this is an opportunity to join the group I've been admiring since its creation. Please consider this application, I will do my best to help the group twice as much as it will help me.

Name:

My name is Nikolas. Friends call me Nick. The Greek short form of my name is Nikos. Other people call me by my nickname which is Delirium or Del for short! - Feel free to call by whichever of those pleases you the most.

Age:

I am 21 years old. My birthday is on the 4th day of June. I've been on HackForums since I was 16, which means I am a member for 5 years! Quite a long time I presume ?

What languages are you familiar with:

The language I am the most familiar with is C#. It has been my main programming language for a few years already and I believe I am quite fluent in it. I am able to develop rapidly using it and I am also capable of writing any common application without much research. In addition to C#, I am also fluent in Visual Basic since it's the language that has driven me to learn C#. However, I rarely use it as I find C# more elegant and beautiful. This is no issue however, as both compile to pretty much the same MSIL code but I'd rather use C# instead. I am very active in the .NET section and I've helped quite a few people. I have provided some snippets as well, including a Crypter example which is very popular (according to the views & downloads).

I am also fluent in PHP, HTML and JavaScript. I'd rather not use any framework to develop a website but if it's necessary, I am using Laravel to ease my work. I am also a fan of Bootstrap when it comes to design, so if there's any Bootstrap fan club, count me in! As for JavaScript, my main library is jQuery although some Vanilla JS doesn't hurt every now and then. Unfortunately, I am not very good with CSS and therefore I usually rely on ready-to-use templates but I can do some modifications myself and that's without even studying it for more than a few hours in total. I've written the website of my business myself (I can provide the link through PM) and I've also setup a couple of forums but that has nothing to do with it, except for the fact that I wrote some plugins myself.

Lately, I've been studying a lot of C++ and I am currently able to write some code focused on Windows. My only C++ snippet (which I have posted on the C++ section) is a WinInet client wrapper which uses asynchronous requests, both POST and GET. I have a huge thirst to learn C++ well and I believe I am on the correct course to learn it rapidly. I can read a complex snippet and understand at a great extent what it does even though I am not quite fluent with it.

As for the rest, I am not familiar with any of those language but my guess is that I can understand code written in some of them, e.g Java or Python. I am also good with white hat issues, such as malware removal as I've been selling a crypter myself and I was in the RATing scene for quite a long time, therefore, I presume I have the ability to find out if there's a virus installed on a computer and how to remove it.

Your past work:

I have released a lot of snippets on the .NET section and these days, I am planning to release some in the C++ section too. My past works include a crypter project which I maintained by myself solely for 2 years and I have also written a stealer which is on testing phase. I have written a couple of websites as well, without counting my own one. Some of my contributions are listed below:

C# and Visual Basic contributions:

- [A crypter example in C#, my most popular one.](#)
- [A progress bar control with percentage counter.](#)
- [A CoreFTP stealer snippet which decrypts the encrypted password.](#)
- [A simple tool using Mono.Cecil to add resources to a compiled assembly.](#)
- [A class which upload to Pastebin using its API.](#)

C++ contributions:

- [My largest C++ project: An editor for LUA files written to be used with an emulator for a game I was playing. It has some nice features such as code folding, automatic indentation and code completion. It is written using the Qt framework.](#)
- [A WinInet client wrapper using asynchronous requests.](#)

How much time do you have on your hands:

I have around 4 to 6 hours free per day and it definitely includes browsing HackForums!

One final note:

Please consider my application, I will not disappoint you! I believe I can be a great asset for the group and play my part in it by helping it grow in quality! I am a friendly person who rarely has rage bursts but those go away in the blink of an eye. As you can tell, my English is highly advanced and thus, communication problems will not occur. I hope I did not bore you a single bit with my application and I also hope that it was pleasant to read. Thank you.
