Thread: [\[Method\] Spreading Method | Easy and free!](#)

Bo Burnham - June 18, 2015, 6:13 pm

Hey guys! This is my first actual spreading method for HF. I have some, but I thought since this was the first method I ever used, I'll let it go with a bang.

Anyway, cut this shit.

Bo Burnham's Spreading Method: Also credit to Fetz :D <3 i luv u m8
Step 1:

HOLD ON! I'VE RELEASED A PROGRAM TO SEND THESE SLAVES TO YOUR SKYPE SO YOU CAN CLAIM THEM! CHECK IT OUT [HERE](#)

Make a fake skype account so you can do this method. Make sure you use a sexy profile picture so then they'll do anything pretty much.

^ As you can see, that looks pretty hot xDD

They'll do anything to see her nude. This is where your stub comes in.

Step 2:

You'll need to make a stub and crypt it. As soon as you're naming the stub, make sure to name it, "funcam-installer3.2" or something along those lines.
(You could also add a fake error message - or make a fake program in VB)

After that, and your profile is ready, start going to these websites and list your skype on them:

www.speed-friends.com

www.bestusernames.com/

www.addmecontacts.com/index.php

www.blarus.com/index.php

www.addmeskype.com/Default.aspx

www.skypecontacts.eu/

Once you've listed your skype, you'll see that you have a lot of requests..

Start adding them and convince them that your webcam isn't being detected by skype and that you would like to have some "fun" on cam with them.

Here's an example that worked for me:

"i recently turned 18 and i want to show my body off but skype wont detect my webcam ;/ can we use camjoin? xx it is a free video chat software"

If they respond saying "can i see pics first?", you could send them a picture if you have another shot of the girl in your profile picture on your computer somewhere.

If you manage to find someone who just says "yes" to everything then send him the stub immediately. These people don't come often and I'm sure you'll instantly love those kind of people that really like taking .exe's over skype.

Anyway, if shit doesn't go well, act like a dumb blonde and just reply with horrible grammar but not to the extent where they cannot understand.

This isn't the best method out there, but it has been my first one and I've earned multiple slaves from doing this ;p

They are not all just from this method ?

I've used torrents and such.

Anyway... I hope you've learned something from this and I wish you luck in spreading your malware to your victims! ??

IMPORTANT!

Don't upload your .exe to any websites!

I always send it as an .exe over through skype and I've always been a success.

Clayer - June 18, 2015, 6:54 pm

Just to let you lads know the infection rate is about 1 per 300 contacts. It might work for you though ;)

Edit: This was a joke, I've gained about 4 tonight alone. It takes a bit of time and effort but it will work if you find the right people. Just a heads up, in the begining make sure to ask if they're using a phone. If they say yes I instantly block them and move on. This method definitely does work but you will have to put some time into it.

You know that isn't true. Maybe actually put some effort into your profile picture instead of grabbing a saturated one off of google images.

Edit: complains in my thread when he's the fucking one in the wrong...

What in the fuck is that name..?

Not true at all. It's how you go about it. I've gotten shit load of people from a chat room with no picture at all. If you do it right and well like this thread says how to then people will get a fair amount I'll imagine.

Hint: don't use pictures that look professionally taken .. Use ones that look like silly girls taken on there phone and probably don't get from Google

This works, I also use omegle under common interest of "Skype" and "female/boobs" lmao, I just use yuis omegles spammer and I get multiple requests, after that I just say some random shit like "rate my body out of 10 pls" and I send them the stub. Some know not to accept .exe's so I change the extension to JPEG. works all the time

Ah, I've never had any luck with omegle with the tutorials I had followed, but I don't fucking complain on them at all. I actually appreciate people who give back in the RAT section and in all fairness, I was using a saturated image and my stub was "boobs.exe" ???

Totally going to get slaves now ?

LMAO "boobs.exe" Make it like DCIM142exe.JPEG/PNG

Purps - June 18, 2015, 7:34 pm

Right, and now add the RTLO trick and make them think they are downloading a jpeg on the first go.

edit: may not work on skype, I haven't really tried spreading on skype lol

Limited Edition - June 18, 2015, 7:35 pm

Correct me if I am wrong but can't you had a .exe in a .png? or something like that?

Surly if they see a .JPEG or .PNG they're more likely to accept.

100% correct!

If you spoof the extension, you will see a .jpeg, others will see

"yourvirusjpeg.exe" even though for you it will be "yourvirusexe.jpeg"

.scr seems to work well! Maybe some of you guys could try that? Might lead to a better success rate..
cough clay..

This is too saturated relating to ewhoring. I am working on a new twist to this method, but will need some coding help

custeR - June 18, 2015, 7:54 pm

I just got roughly 15 contact requests within 3 minutes that I got overwhelmed and closed skype. I can most definitely see this method working.

I can see how it's related to e-whoring, so I ended up putting MY own twist on it.

That was instead of asking for money, I was just up front and asked them if they'd like to have some "fun" on a video chat software client for your desktop and everything just worked like I wanted it to.

(Jun 18, 2015 07:54 PM)ttyl Wrote: [\[CITE\]](#) I just got roughly 15 contact requests within 3 minutes that I got overwhelmed and closed skype. I can most definitely see this method working.

The exact same thing happened to me but now it's fine. You'll have to have 10 skype calls at once to piss me off.

custeR - June 18, 2015, 8:00 pm

How many clients did you obtain total from this method?

I only usually use them for the DDoS panel in LuminosityLink.

And maybe just a little remote scripting > sending them to a screamer with their webcam on xD

When they run out of their room.. It's pretty funny xD

(Jun 18, 2015 08:09 PM)Clayer Wrote: [\[CITE\]](#) I've gained about 4 tonight, just got another one as I was typing this

Use a legit name for the stub and your profile.

And don't ask for money, that's the number one thing that people do not like and they'll most likely block you and carry on to the next female they want to prey on.

This is a different type of e-whoring. They're still paying you in a way ;) If you know what I mean ?

As many as you would need for a botnet.

I'd say around 60-70

I tried 30 and I barely went off. I hit myself for 30 seconds while in a skype call and my voice just lagged.

They use some fucked up name for their profile or stub and just complain to me saying "gay method not working kek on my mum's ass" like ffs ._.

I see a screenshot of their skype or something and I just get pissed at them because they literally aren't following the actual tutorial and name their profile like "EMILYBABEOHMYGODNOTABOT" ...

Luminosity's DDoS Function is terrible.

Would recommend IP Killer v2.0 if you need a download you can contact me about it.

Dont hate on me 10k dont make me come to your house you cunt burger xD

But seriously IP killer effective asf 2-3 bots down a home. Thanks for reading ?

Vouch for this method (somewhat good, never perfected it though)

Hitman running at about 230 bots and cant hit himself off says something.

Look what I'm saying is that convincing someone to run a file via omegle/skype/any other IM

service is an outdated method. All you did is post your personal excuse, it's like me saying "I tell people that my friend's cat ate LSD and he sent me the funniest picture" and then send them the picture.

It's not an invalid method but it's an oversaturated one and honestly it gets LQ slaves.

I dont understand why you neutral repped me when I said that getting someone to download a webcam setup is saturated, because it is.

OK so here's what I understand of you:

- 1) You think it's OK to act like an asshole because others do it too
- 2) You think you're entitled to speak to non-leet members as inferior because you got your mom's credit card and bought leet
- 3) Instead of trying to help people on HF, like a privileged member of the community should, you fish to be worshipped, complain about leechers when you aren't, and complain about other users being LQ when they post stuff quite frankly better than this

You sir are the reason HF has gone to shit, and you're proud of it.

Are you retarded or just trolling?

The method I provided was to illustrate how dumb yours was, just changing the excuse is all.

"Provide proof" is admission. We both know you only care about yourself and your rep....

Where is your proof that I infected a HF member or atleast tried to?

Apparently it's still cached somewhere.

If I haven't even contributed how come I've got 5 rep?

Please explain this: Why do you:

- 1) Leech public methods found on 300 other spreading guides
- 2) Post them back on your own
- 3) Complain about leechers when people aren't interested by the same methods they've already seen
- 4) When someone points this out give them neutral rep and call them LQ

5) Feel like you're correct

You aren't going to get a method on here that is gonna give you 500 slaves that is autopilot and most of the slaves you got are going to be models from africa.

It's better than most methods and my experience with torrents in the last few days have been horrible. I've managed to pull off around 20 slaves in 1 day from just chilling with it (you can open two skypes, speed up the process by removing some of the chat messages and make up your own)

Vatnik - May 1, 2016, 5:59 am

This is not a bad method but I wish there was a way to automate it... Autopilot it.

I was thinking of autopiloting it by making a skype bot attatched to the skype what would respond to messages along the lines of, "can we cam", "cam pls?". Anything involving the word can would receive a response like, "no sorry no cam" and ect..
