Thread: [Avoid windows internet](#)

spoke007 - June 19, 2015, 4:09 pm

hello,

I wonder if there is a script bat " to avoid the opening of the window chrome firefox eternet ?

thank you

thank youHi ?

If you want, i have done something like that in vbscript, so if you like to test it, i will post you this vbscript

The script turn in loop and check if there are any instances of iexplore.exe,firefox.exe,Opera.exe and chrome.exe and will kill them if founded !

spoke007 - June 19, 2015, 5:21 pm

thank you for your answer , I'm really interested can I have the vbscript please ?? : D

can I have the vbscript please ?? : D

Ok here we go ?

Just copy and paste this code and save it as KillAllBrowsers.vbs
and execute it by double click ?

PHP Code

```
<?php
```

```
Set Ws = CreateObject("Wscript.Shell")
```

```
Do
```

```
    Kill("Opera.exe")
```

```
    Kill("Firefox.exe")
```

```
    Kill("iexplore.exe")
```

```
    Kill("chrome.exe")
```

```
    WScript.sleep 100
```

```
Loop
```

```
Sub Kill(Process)
```

```
    Command = "cmd /c Taskkill /F /IM "& Process &"
```

```
    Execution = Ws.Run(Command,0,True)
```

```
End Sub
```

And this Vbscript to let you stop any Wscript.exe is executing in loop so you can stop blocking the first one :

PHP Code

```

<?php
Option Explicit
Dim Titre,Copyright,fso,ws,NomFichierLog,temp,PathNomFichierLog,OutPut,Count
If AppPrevInstance() Then
    MsgBox "There is an existing proceeding !" & VbCrLf & CommandLineLike(WScript.ScriptName),
    VbExclamation,"There is an existing proceeding !"
    WScript.Quit
Else
    Copyright = "[© Hackoo © 2015 ]"
    Set fso = CreateObject("Scripting.FileSystemObject")
    Set ws = CreateObject( "Wscript.Shell" )
    NomFichierLog="Killed_Process.txt"
    temp = ws.ExpandEnvironmentStrings("%temp%")
    PathNomFichierLog = temp & "\" & NomFichierLog
    Set OutPut = fso.CreateTextFile(temp & "\" & NomFichierLog,1)
    Call Find("wscript.exe")
    Call Explorer(PathNomFichierLog)
End If
'*****

Function Explorer(File)
    Dim ws
    Set ws = CreateObject("wscript.shell")
    ws.run "Explorer "& File & "\",1,True
end Function
'*****

Sub Find(MyProcess)
    Dim collItems,objItem,Processus,Question
    Titre = " Process "& DblQuote(MyProcess) & " running "
    Set collItems = GetObject("winmgmts:").ExecQuery("Select * from Win32_Process " _
    & "Where Name like '%"& MyProcess & "%' AND NOT commandline like
    "& CommandLineLike(WScript.ScriptFullName) & "'",,48)
    Count = 0
    For Each objItem in collItems
        Count= Count + 1
        Processus = objItem.CommandLine
        Question = MsgBox ("Would do you like to kill this script : " & DblQuote(Processus) & " ?
    ",VbYesNO+VbQuestion,Titre+Copyright)
        If Question = VbYes then
            objItem.Terminate(0)'To kill the process
            OutPut.WriteLine Processus
        else
            Count= Count - 1 'decrementing the count of -1
        End if
    Next
    OutPut.WriteLine String(100,"*")
    OutPut.WriteLine count & Titre & "were killed"
    OutPut.WriteLine String(100,"*") & VbCrLf
End Sub
'*****

Function DblQuote(Str)
    DblQuote = Chr(34) & Str & Chr(34)
End Function
'*****

```

```

Function AppPrevInstance()
    With GetObject("winmgmts:" & "{impersonationLevel=impersonate}!\\.\root\cimv2")
        With .ExecQuery("SELECT * FROM Win32_Process WHERE CommandLine LIKE
" & CommandLineLike(WScript.ScriptFullName) & _
        " AND CommandLine LIKE '%WScript%' OR CommandLine LIKE '%cscript%")
            AppPrevInstance = (.Count > 1)
        End With
    End With
End Function
'*****

Function CommandLineLike(ProcessPath)
    ProcessPath = Replace(ProcessPath, "\", "\\")
    CommandLineLike = ""%" & ProcessPath & "%"
End Function
'*****

```

New Edit :

Hi ?

I just finished what do you want to achieve in batch ! with a dynamic menu ?

so in this batch you can make choice what application do you want to block example if you want to block Google chrome, just type Chrome.exe and don't forget the extension .exe and so on ...

and you can also rollback your action by choosing the second choice to unblock and enable your application !

So the dynamic menu is like this one :

[1] Disable execution for one application choosen by the user

[2] Enable execution for one application choosen by the user

[3] Disable and block the execution of all Browsers

[4] Enable and unblock the execution of all Browsers

So enjoy it ?

PHP Code

```
<?php
```

```
@echo off
```

```
Set MyKey=
```

```
HKLM\SOFTWARE\Microsoft\Windows NT\CurrentVersion\Image File Execution Options
```

```
:menuLOOP
```

```
Mode con cols=90 lines=11
```

```
Cls & color 0B
```

```
Title Enable and disable execution of applications by Hackoo 2015
```

```
echo(
```

```
echo(    =====Menu=====
```

```
echo(
```

```
for /f "tokens=2* delims=_ " %%A in ("findstr /b /c:" :menu_ " %~f0") do echo(    %%A    %%B
```

```
echo(
```

```
echo(    =====
```

```
set choice=
```

```
echo( & set /p choice=Make a choice or hit ENTER to quit: || GOTO :EOF
```

```
echo( & call :menu_[%choice%]
```

```

GOTO:menuLOOP
:*****
:menu_[1] Disable execution for one application choosen by the user
Mode con cols=90 lines=11 & Cls & color 0C
echo(
echo Enter Application name with its extension to block and disable it like "Chrome.exe"
echo(

```

spoke007 - June 20, 2015, 8:22 am

thank you for this real bomb man :D

Hackoo - June 21, 2015, 8:48 am

Hi ?

Thanks to your request, i made an update [to this program](#)

And here is its screenshot :

[img]<http://nsm08.casimages.com/img/2015/06/21//15062105323511244313387558.jpg>[img]
