I was given the account he promised

After using the method the a little while with the help from him via Skype I then logged off for the night with 37,501 bits (after he helped me with a little thing and added a couple more bits for me). I then went to login this morning using the same link he gave me and the balance of the account was 0. I then sent him a PM regarding this and haven't heard anything from him.

I know this isn't a lot of money, but I'm trying to prove a point of people with these refund options

that don't give them. I was promised an account with 10,000 bits, but "somehow" someone else got the link and took the bits.

Ask the user for his BTC wallet so we can see transactions to and from it.

Dude it's 5 dollars.

Cut your losses.

Pretty sad that someone would scam that little though.

What about giving him some time, wait 48 hours at least before making the dispute, maybe he is jot online or whatever

Doesn't look like it's happening if he isn't answering.

I know, but that isn't the point.

Time? He has time to look at the messages I sent over hour span, he has time to reply with a quick "hold on."

Why would you buy an ebook in the first place? They're bullshit and a waste of money.

Funny how he would scam your over \$5 though... Pretty sad.

True, but I was mainly looking for the account with the bits.

Why would you scam if you're UB3R, especially if it's only 5 bucks.
