Thread: [Good sites to use when making pic packs.](#)

Ok... So I'm a bit pissy in my pants. That moment when you make the perfect pic pack, that's so good, but then you notice that you don't have any selfies of the girl... ? And that she has some weird fucking hair color like dark blue. So here's a comp of sites I use when making pic packs. For obvious reasons, I can't put links to them.

gigabox - Going through some of the photos and some of them look like minors, plus a lot of the image quality is shitty.

Schoolgirlsdrunk - Once again, some of the girls look like minors.
