I recently came back to ewhoring june 18th for around 2hrs and made only 10 for around 35mins work the rake in that day was terrible. June 19th came around and I was being lazy and hardly did shit then today in the span of 1 1/2hrs I was able to get someone to send me 20\$ for 25 pics then he bought again and I double dipped him for 40\$ making it 60\$ total ?? the earnings is good so far today and I'm motivated to make a shit ton more today atleast 150\$.

P.S the -20\$ transaction was sent to a paypal that I have that is used only on a VPS so I havent been limited yet I will not lie and admit I have used this paypal like 5 times on my normal IP and nothing yet

Question:

If you are e whoring and asking for amazon gift cards, and you are in the US while they are in a different country (like the UK), will there be an issue transferring the cash? Or will it automatically convert from the different currencies.

Good job mate, never gonna give up!

Keep it up.

And before I went to sleep I made 5\$ more just woke up with 30 new contacts let me keep going :)
