This tool is amazing! It's very well made and extremely unique.
I've personally never seen another tool like this in the market , and I love fresh ideas.

The developer is very skilled in the field of Java and quite franky I'm suprised no one else took this opportunity , it's an untapped goldmine!

Skype Domination functions brilliantly , it has the capability of messaging more than 50,000 people per minute.

All you do is use the Skype ID scraper , save the scraped Skype names , load them with Skype Domination , enter your message and hit start.

The recent update which added sleep / wait functions to Skype Domination prevent the inevitable ban that used to occur.

It also prevents the program crashing after 5000+ messages which is fantastic.

So , what can it be used for? Personally , I used it for advertising links to this website , which seems to have worked quite well , I was checking the analytics and received over 500 new visits within a 12 hour period.

That may not sound like much , but when you take into account that I only messaged 7000-8000 people , it's phenomenal!

It can also be used to spread malware too , although I hadn't tried personally , I did have a few ideas about how to spread efficiently with it.

But I think the main way consumers can benefit from this is monetization, you can use this for PPD / CPA and make some nice cash if you use it efficiently.

I thought I'd mention how simple it is to understand as well , I think there's only one button on the whole program , with only two tabs , one for the custom message and sleep time , the other to start Skype Domination.

Final Verdict

It's extremely well made , efficient and beneficial. Using this for an extended period of time and investing time into finding accounts / messaging will most likely leave you profiting.

It's affordable as well and support is quite wonderful , Skype Domination was made by a very experienced Java programmer who knows what they're doing.

I wouldn't hesitate to buy this if I didn't already own it!

This is my review for the PDF wich contains the tutorial.

The grammar has improved since your last ebook.

The design didn't change.

The tutorial is easy-to-use for everyone, links and images are included.

I'd give this tool a 7/10, you guys might not agree with me, this is my personal opinion.

One of the best tools I have used and will really help me with my future projects. 10/10 for this tool really easy to use and understand. Works brilliantly. Instructions are very easy to understand and everything is provided nicely. Takes only 5 minutes to do and all is needed is skype.

Worth the price 100%, amazing tool. Will save 1000s on advertisements. You can send any message to anyone.

To anyone interested, this will be one of the best purchases you will make.

Thank you very much.

Will this auto reply to these members, or will it just randomly spam a pre-defined msg to people w/o replying back to them if they reply?

Do you have an option to add your own list to spam, or does it scrape from a site?

I could easily add an auto rponder, but it would be useless because Skype cant handle so much contacts without freezing. And it scraps Skype Usernames from the Skype Databases, that mean you will be able t send a message to every Skype User if you have enough time.

No more Voich Copies left, please stop PMing me.
