Thread: [NALSec DDoS Protection | Advanced Layer 7 and Layer 4 Protection | WAF | Free |](#)

Syracusia - June 20, 2015, 5:26 am

Hello everyone,

Today I will be releasing a free service which is <http://nalsec.com>

This service acts as a reverse proxy similar to CloudFlare, although we have advanced layer 7 and layer 4 protection in place.

We feature a custom WAF and browser integrity checks.

This service will ACTUALLY stop layer 7 attacks, unlike CloudFlare.

Most importantly, this service will be free!

I have already coded the software, you can view a live demo @ <http://nalsec.com>

I can manually set you up with the DDOS protection for now just post in the thread or PM me.

I am coding the front end right now so you will be able to setup the ddos protection for your website yourself.

Please leave any feedback if you have any!

Bangerz - June 20, 2015, 5:40 am

This is really something nice :)

Would use it, if I would have a website.

Syracusia - June 20, 2015, 5:43 am

(Jun 20, 2015 05:40 AM)Bangerz Wrote: [\[CITE\]](#) This is really something nice :)

Bangerz, thank you for the feedback :)

I will be releasing a free web hosting company soon also! ?

DevNet - June 20, 2015, 7:19 am

Oh hey it's this kid again.

Delevingne - June 20, 2015, 7:20 am

But.. you are using CloudFlare?

Syracusia - June 20, 2015, 7:21 am

(Jun 20, 2015 07:20 AM)B?EF Wrote: [\[CITE\]](#) But.. you are using CloudFlare?
CloudFlare is a CDN, I am not using their "I'm under attack mode" because it doesn't work.

So I am using NALSec ddos protection with cloudflare cdn performance

DaL33T - June 21, 2015, 1:07 pm

(Jun 20, 2015 05:26 AM)Novaly Wrote: [\[CITE\]](#) I have already coded the software
What exactly did you code because everything I see is CloudFlare and that nginx testcookie plugin
- all public stuff.

Syracusia - June 21, 2015, 4:02 pm

The whole dashboard, the check page, I don't use nginx testcookie plugin. I also don't use
CloudFlare.

Also I coded the ddos mitigation system.

(Jun 20, 2015 07:20 AM)B?EF Wrote: [\[CITE\]](#) But.. you are using CloudFlare?
But.. I am not thanks though ?

(Jun 21, 2015 10:16 PM)Novaly Wrote: [\[CITE\]](#) I appreciate your concern, could you please tell me what about this service you dislike so I can fix it?

I dislike the service in general, anyway to fix that?

Syracusia - June 21, 2015, 11:51 pm

(Jun 21, 2015 11:44 PM)XR8ED Wrote: [\[CITE\]](#) I dislike the service in general, anyway to fix that?

Well I am coming out with a lot of new features soon that will probably change your mind. ?

Lucifer Morningstar - June 21, 2015, 11:54 pm

Do you even have any content on your website? I'm stuck on "Checking your browser".

Syracusia - June 22, 2015, 12:04 am

(Jun 21, 2015 11:54 PM)Tx707 Wrote: [\[CITE\]](#) Do you even have any content on your website? I'm stuck on "Checking your browser".

Of course! It will take time, just let it load you have to have the web page open.

I will make it so that it works on lower end devices.

Sorry about that ?

BTW I just decreased the check page difficulty, try again :)

Lucifer Morningstar - June 22, 2015, 1:05 am

(Jun 22, 2015 12:04 AM)Novaly Wrote: [\[CITE\]](#) Of course! It will take time, just let it load you have to

BTW I just decreased the check page difficulty, try again :)

I don't have a lower end device and it shouldn't matter anyways.

I left the page open for 1 minute and it's still "checking my webbrowser". Tbh. no one will use your protection if it has false positives like these.

Syracusia - June 22, 2015, 1:25 am

(Jun 22, 2015 01:05 AM)Tx707 Wrote: [\[CITE\]](#) I don't have a lower end device and it shouldn't matter anyways.

Eilif - June 22, 2015, 3:38 am

The fact that you are calling cloudflare insufficient and lacking, yet you use it for your website gives us conflicted feelings.. Why is that? Is it to hide the location of your webserver or are you simply reselling cloudflare protection via some ingenious API access?

However I am very interested in this service as, what you said about cloudflare and layer 7 is not far from thruth. Care to explain where you calculated this 720 Gb/s and 1250 Kr/s? Where do you host? Who is providing the bandwidth, how is the peering? What peers do you have? (ASN)

What are the package prices, how much do you Charge, why should we choose this over cloudflare? Is it your expertise in the mitigation field or something else?

Regards,

Edit: There is no ToS or Privacy Policy on front page footer area. Where can these be found at?

ToS is at the control panel before you login.

Of course we don't use CloudFlare, because CloudFlare simply doesn't work. I use to use CloudFlare and it didn't stop any DDoS attacks so I made my own protection.

My server's network is 720Gb/s capacity.

Also I don't use CloudFlare for <http://nalsec.com>

AzkCoding - June 22, 2015, 4:00 am

Are you sure you have really nice DDOS Protect ? or you just using cloud on OVH?

Joaquín "El Chapo" Guzmán - June 22, 2015, 4:03 am

Vouch for novaly hes a legit and cool guy :)

Syracusia - June 22, 2015, 4:07 am

(Jun 22, 2015 04:00 AM)AzkCoding Wrote: [\[CITE\]](#) Are you sure you have really nice DDOS Protect ? or you just using cloud on OVH?

Cloud doesn't protect from Layer 7 my friend. I have a custom coded WAF and check page, see it for yourself :)

(Jun 22, 2015 04:03 AM)MossieX Wrote: [\[CITE\]](#) Vouch for novaly hes a legit and cool guy :)
Thank you for the vouch! ??

My server's network is 720Gb/s capacity.

Also I don't use CloudFlare for <http://nalsec.com> That did not answer even half of the questions :/

Whois record from 45 mins ago lists your webserver/domain behind cloudflare and it also resolves to cloudflare ip-address. If the Whois is wrong and ure not using cloudflare anymore it should not connect yet it still does, and through cloudflare ip as well.

Correct me if im wrong,

So basically you are renting dedicated server from some host that comes with 720 Gb/s DDoS

protection. Then you proceed and sell this dedicated server as a reverse proxy for your client's webserver? Or are you claiming that the server you rent is on a terabit line?

PLT ? - June 22, 2015, 4:33 am

To say CloudFlare doesn't stop any attacks is false.

This does look pretty nice, though. I'd start offering premium plans if I were you.

Justin Hale - June 22, 2015, 5:04 am

This is so bad lol.

The index of your site is just a javascript redirect, not DDoS protection, anyone with a brain will know this because I can visit any page on your site (other than the index), and not need to wait.

Using javascript to redirect from your index after 5 seconds doesn't = DDoS protection.

My point being that if you're retarded enough to do that, I don't even want to comprehend how non-existent (Or retarded) your "DDoS mitigation" is.

Eilif - June 22, 2015, 5:25 am

(Jun 22, 2015 05:04 AM)Justin Hale Wrote: [\[CITE\]](#) This is so bad lol.

From what I know you are using OVH.

Also your 'cookie' check can be spoofed, i changed the cookie value to anything and it lets me access the site. (?)

I held down F5 and got blocked, fail2ban r/s limit? xD

What other locations are you using?

I managed to block pretty damn large attacks with a OVH VPS + R/S Limit.

Syracusia - June 22, 2015, 6:33 am

All less than .2 seconds

<http://prntscr.com/7jxrlp>

Not too bad actually

I will look into the cookie problem

DaL33T - June 22, 2015, 6:37 am

I don't understand how this is a CDN either. You obviously aren't using GeoDNS since I resolved using different resolvers and it always resolved to the OVH IP - it's also not anycast since I tracerouted from a few different servers in different places.

Oh.. and this is OVH's DDoS protection - you're just a reseller. You don't own shit.

'An0ny - June 22, 2015, 6:40 am

prntscr.com/7jxh3t

No, it's just the FUCKING INDEX, I can visit /Landing & it doesn't call your 'check page'.

Let me make it clear;

ITS JUST A FUCKING INDEX

A JAVASCRIPT REDIRECT IN YOUR INDEX IS NOT FUCKING DDOS PROTECTION.

'An0ny - June 22, 2015, 6:46 am

(Jun 22, 2015 06:44 AM)stefeman Wrote: [\[CITE\]](#) I suppose hes going to "code" layer 7 filter to work with OVH anti DDoS. Or do it via software otherwise. At least that i'd imagine hes gonna say next.
He already has one to filter out bots from reaching the 'main' server / 'victim'. Works on all kind of layer-7 attacks from my experience.

I have similar setup for my forum.

Hes routing all traffic through a html i suppose, which has javascript that sets cookie. If the user can't read the javascript, nor accept cookies. Then it won't let him access the site, and from what I know no attacks allow neither one (at least booters). Botnets might. But they would hit r/s limit, gg.

Gwapo - June 22, 2015, 6:46 am

Yes please stress test it, and let me know if you can drop it.

?

It has been started.

Its a layer 4 attack at the moment.

Site is loading but extremely slow, vac is also enabled.

Syracusia - June 22, 2015, 6:51 am

(Jun 22, 2015 06:50 AM)An0ny Wrote: [\[CITE\]](#) Site is loading but extremely slow, vac is also enabled.
Yeah I am noticing slightly erratic loading times during the attack. Sometimes NALSec is loading quickly, sometimes it is loading.

Conclusion: Still Accessible

Try to refresh it, shows down on my side.

OP please confirm or let me know if you wish me to stop.

You should add more filtering on your Layer4 protection, don't depend everything on OVH VAC.

Please do take my advice to help improve your Protection, I have no intention to trash your project.

PS : I have stopped the attack.

What kind of attack did you use?

Gwapo - June 22, 2015, 7:01 am

(Jun 22, 2015 06:59 AM)'An0ny Wrote: [\[CITE\]](#) What kind of attack did you use?

UDP Attack with random ports.

'An0ny - June 22, 2015, 7:02 am

(Jun 22, 2015 07:01 AM)Gwapo Wrote: [\[CITE\]](#) UDP Attack with random ports.

In other words, he should drop all UDP Traffic xD

Gwapo - June 22, 2015, 7:06 am

(Jun 22, 2015 07:02 AM)'An0ny Wrote: [\[CITE\]](#) In other words, he should drop all UDP Traffic xD

He should have done that from the start since he is just doing reverse proxy.

Watch out for Layer7, exploit floods can rape your webserver really hard.

Syracusia - June 22, 2015, 7:07 am

(Jun 22, 2015 07:01 AM)Gwapo Wrote: [\[CITE\]](#) UDP Attack with random ports.

Please try the attack one more time sir, thank you. ?

Syracusia - June 24, 2015, 3:24 am

The software is now completely setup, enjoy!

Eilif - June 24, 2015, 3:35 am

Gonna try this tonight when i get home

Syracusia - June 24, 2015, 3:37 am

Sounds great man thank you for being part of something great!

Syracusia - June 26, 2015, 10:33 am

Just added a custom check page.

Will be adding more check pages shortly!

Lucifer Morningstar - June 26, 2015, 12:45 pm

Reset the banned IPs I want to try again. I modified a couple of things. ?

Syracusia - June 26, 2015, 12:48 pm

We don't have any banned IP sir ?

Avunit? - June 26, 2015, 7:03 pm

Your source is still ridiculously insecure. Anybody who uses this service don't expect any level of security with regards to your information.

Decafe - June 26, 2015, 7:49 pm

Not to mention their 'Advanced layer 7 protection' is just a static cookie.

Syracusia - June 27, 2015, 2:03 am

(Jun 26, 2015 07:49 PM)Decafe Wrote: [\[CITE\]](#) Not to mention their 'Advanced layer 7 protection' is just a static cookie.

The static cookie is just a splash page, it has nothing to do with the actual protection.

Although it does stop a lot of bots ?

(Jun 26, 2015 07:03 PM)Avunit? Wrote: [\[CITE\]](#) Your source is still ridiculously insecure. Anybody who uses this service don't expect any level of security with regards to your information.

What information? You mean passwords where we are using 10 round hashing algorithms?

Please don't speculate ?

pgorangeman - June 27, 2015, 5:09 am

Do you even know how layer 7 works nothing to do with ping, nor actual mitigation on your video

Hazy - June 27, 2015, 5:11 am

I'll stick to Crimeflare for the time being ;-;

?Plutus - June 27, 2015, 7:43 am

I think cf & pineapple proxy are better than this

Syracusia - June 27, 2015, 7:47 am

Thank you for the feedback, enjoy the software!

Surday - June 29, 2015, 5:12 am

The source is very insecure..

I wouldn't trust my information with this user or his site.

SIM-1472133 - June 29, 2015, 5:13 am

LOL another piece of crap software developed by an official Smart Kid In Development.
