Thread: [PRIVATE HACKING LESSONS - ONE ON ONE - LEARN TO HACK - PRIVATE TUTOR - 10\\$ PER HOUR!](#)

bandors - June 20, 2015, 1:54 pm

August / September 2018 New Student Promotion: Five lesson plan, 50\$. Each lesson is an hour.

Tutelary - June 20, 2015, 1:56 pm

Vouch for Bandors. Always a great guy with high quality services. Never hesitate to trust or deal.

NoMemes - June 20, 2015, 2:16 pm

I can vouch for bandors too. He has always been a legit and honest guy.

Auxil - June 20, 2015, 2:18 pm

Vouch for my man Bandors. He has helped me in over 15 different situations where I needed data recovered, or something slightly darker. I lost a site to a deface, a null root, and a domain hijacking.

He completely took over the situation, and in less than two weeks, I had everything back.

In another situation where I needed someone to regret doing such things to my sites, he took control of that situation too, and let's just say I haven't had any more problems with said individual since then.

He really knows what he is doing, and if he wasn't such a rebel, I'm sure he could work for the government.

Aurora - June 20, 2015, 2:50 pm

I'd like to leave a vouch for Bandors. He knows what he's doing, and I'm positive you will not be disappointed with him.

Troja?Hors? - June 20, 2015, 2:58 pm

Huge vouch for Bandors, knows his shit. Trusted member.

Thanks,

TH.

Wirt - June 21, 2015, 5:36 pm

I vouch 100% for Mr. Bandors. He knows what he is talking about.

Musketeers - June 21, 2015, 5:38 pm

Just passed a couple of hours with him and I learned so much things. I'll buy some more during the

week when I'll get my pay from work !

Legit services, vouch.

SIM-1729678 - June 21, 2015, 10:25 pm

Worth every single dollar! vouch for Bandors.

CatSoup - June 22, 2015, 1:36 pm

Vouch for bandors, I've known him for a while and he truly knows what he is doing, best around.

bandors - June 22, 2015, 1:37 pm

Thank you everyone for the vouchers. I hope I can find some new students to teach.

??ph??l - June 22, 2015, 7:30 pm

Huge vouch for Bandors. He is probably the most skilled hacker on this site and is an amazing teacher. ?

Hey,

I'm very interested in buying your service but you just tell people you will teach them "hacking" tutorials.

I was just wondering exactly you teach your students?

Just send me a PM please of what you can teach...

Thanks

Ok, this looks good. I have some uncertainties, when it comes to bypassing full ASLR and NX on 64bit Linux systems. I'm trying hard via ROP, but have some troubles while building ROP chain.. and what to do, when SSP with its random canary will ON? Offset2lib = impossible, because of RenewSSP, but, can I still obtain mmaped areas?

I hope, you'll teach me it, because I really need a few lessons from ex-haxor on this topic. Ordered right now, Thanks.

I have to say honestly, Bandors lessons are amazing. I am well known on HF for being in the SST field, but I literally am a total newb when it comes to hacking. Bandors lessons and personal attention has opened up new doors for me and allowed me to learn skills I've always wanted.

I will continue to purchase as many lessons as are available. Thanks dude!

Aschorren - July 3, 2015, 2:27 pm

Just had my first lesson with Bandors.

At first, I was a bit skeptical and distrusting like anyone would be of such a revered hacker.

However, my initial reserves could not have been more wrong about him.

He is the epiphany of a great teacher.

We were able to have an excellent time setting up Debian on a VPS on our first lesson.

I have some Debian experience from running my Minecraft servers but he is really helping me polish off my SSH abilities.

He was very patient when I would mistype something, and overall I had an incredible time with this lesson and would 10/10 recommend it to a friend or anyone else for that matter.

I plan on booking a few more hours for later today to get into the juicy stuff.

I've already started to build my computing abilities with this user and have learned tremendously from our initial one hour lesson.

Buy these lessons to not only invest in hacking abilities but to invest in yourself and invest in building a skill set for your future.

Vouchity vouchity vouch vouch vouch.

This user is as HQ as it gets and I'm already eager to learn more in our next lessons.

Just purchased Bandors private lessons, will post back with my review.

Wallenbergs - July 8, 2015, 2:42 pm

I just attended my first lesson with Bandors. At first, it was a bit awkward to be honest, since I had some problems with my connection etc. Although Bandors never gave up on me. We went thru a lot of other nice things which was not really included. I paid for an hour, but I recieved almost two hours of additional time.

Bandors knows his shit, even though my windows were in a completely foreign language, he navigated himself around in milliseconds, he always knew exactly what the problem was, and how we should solve it. My lesson was very very, basic still he was very calm and explained every single step great.

I would definitely recommend his service, 10/10

Personally I have already booked a second lesson.

cyber_one - July 8, 2015, 6:20 pm

Can't vouch for him yet because I am still putting some money together so I can buy some lessons.

Tokyo - July 8, 2015, 7:28 pm

Just finished up my private lesson with Bandors and I have to say, he's experienced. We were going over anonymity and some other important information as well. Very friendly guy that doesn't care if you mess up or not. If you pay for a 1 hour lesson, you'll receive at least 30 minutes bonus time (personal experience). Bandors knows every topic from hacking to de-tracing techniques. Also would like to state that he will play and sing songs for you. Vouch!

On-Topic, I'd like to say good luck teaching people, OP.

He completely took over the situation, and in less than two weeks, I had everything back.

In another situation where I needed someone to regret doing such things to my sites, he took control of that situation too, and let's just say I haven't had any more problems with said individual since then.

He really knows what he is doing, and if he wasn't such a rebel, I'm sure he could work for the government.

So let me get something clear; (I am not sale bashing either, just curious).

You're giving hacking lessons, over Skype?!

You also include a video saying how you're going to help hack?

I don't see exactly what you can teach. Hacking is very broad word that you can't just say "SQLi and XSS". What about teaching them the right way to hack and teach them how to countercombat the attack they're doing?

Aside from the experience teaching/tutoring online have you had any other teaching experience?

I'm really interested in this as I am a complete beginner when it comes to this sort of thing. Especially coding/programming.

Marketing and Business is more my thing. It's always good to learn a new skill or two so I'll definitely be buying a lesson when I have the cash.

He has the tendency not to respond for hours, i did talk to him yesterday though, so if you couldn't get in touch with him in that time then well....you know what happend. Some ask what service? Well he is helping me getting something done for me. I don't know how much the user above me spent on bandors but i gave him 80\$ for a job that was meant to be done in 2 days, it's been over 3 weeks, now if it's not me that bandors is dealing with, he would most likely end up with a scam report. Same here, it's either job done asap or a refund.

Bandors want to provide the best support for his customers correct? When he's busy and his customers need support, how can he give it? To ensure customer satisfaction, we are basically your "middleman" to Bandors.

FullDerpHD - September 22, 2015, 4:45 pm

Can i know why do you people bump his topic? BigHecks vouched multiple times here for no reason also says Bandors service is "great", weird, i talked to him and he said he personally has no idea what bandors is capable of (hacking wise) and here he writes great service, is this a fucking joke?. Let me write you a picture, how does it look and impact Bandor's image.

I see the same people repeating the same things, they are so called messangers, people who NEVER received any service whatsoever from bandors, "PM ME PM ME I WILL HELP, IF ANY

QUESTIONS PM ME" few questions, are you bandors? No, so why would you want me to pm you? You ain't gonna help me with anything, let Bandors speak for himself.

Also i have checked previous scam reports about Bandors, ALL of them said he is acting WEIRD, DELAYING stuff, using excuses, same thing happend to me, it would take an idiot not to think something is wrong, someone literally delays stuff without any sort of logic, doesn't that look weird huh?

In couple of hours i will ask for a refund of my 80\$, MONTH passed, literally nothing has happend, now i understand sometimes people fail, but when someone tells me HE NEVER failed a job and that it's "EZ" that it'll take 2 days tops, yet he didn't finish anything in a MONTH. PROFESSIONAL HACKER who lacks communication with his clients? Ignoring for a whole day? That's pro hacker? Oh also, don't forget, i never forced anyone to do the job for me, i even asked many times "have you done it before? are you sure you can do it? " .

So in few hours i will want a refund, Bandors had few topics in SCAM section and i am sure we wouldn't want to add 2 more right? Nothing personal towards Bandors, i actually enjoyed "talking" to him.

PROFESSIONAL HACKER who lacks communication with his clients? Ignoring for a whole day? That's pro hacker? Oh also, don't forget, i never forced anyone to do the job for me, i even asked many times "have you done it before? are you sure you can do it? " .

So in few hours i will want a refund, Bandors had few topics in SCAM section and i am sure we wouldn't want to add 2 more right? Nothing personal towards Bandors, i actually enjoyed "talking" to him.

Let me write you a picture, how does it look and

impact Bandor's image.

I see the same people repeating the same things, they are so called messangers, people who NEVER received any service whatsoever from bandors, "PM ME PM ME I WILL HELP, IF ANY QUESTIONS PM ME" few questions, are you bandors? No, so why would you want me to pm you? You ain't gonna help me with anything, let Bandors speak for himself.

Also i have checked previous scam reports about Bandors, ALL of them said he is acting WEIRD, DELAYING stuff, using excuses, same thing happend to me, it would take an idiot not to think something is wrong, someone literally delays stuff without any sort of logic, doesn't that look weird huh?

In couple of hours i will ask for a refund of my 80\$, MONTH passed, literally nothing has happend, now i understand sometimes people fail, but when someone tells me HE NEVER failed a job and that it's "EZ" that it'll take 2 days tops, yet he didn't finish anything in a MONTH. "I'm able to turn someone who knows absolutely nothing about computers into a certified hacker."

Who provides the certification?

"SQLi Injection"

"Cross Site Scripting for Beginners"

Any professional hacker should be instructing on a lot more than two basic vulnerabilities, and if you're going to turn someone into a certified hacker they should know a little more than the basics, don't you think?

It depends on how fast you learn, what you already know, and a couple other factors. I've been teaching for a while now, so I'm really good at teaching beginners.

Guy above me literally is full of shit.

I told him I was going to be away for a bit while my net was down. My internet was literally down for three hours and he starts posting shit about me everywhere. What the hell.

I have hundreds of former students who can vouch for this service.

BR?ND?N - August 27, 2016, 5:01 pm

(Aug 27, 2016 03:19 PM)N3urotoxic Wrote: [\[CITE\]](#) Please read.

Hello HF. I will tell you about my experience with Bandors and his lessons.

This is not a BS vouch that is spammed by the same person in this thread 10 times. This is an honest review of what I had experienced with the seller, and I feel I am obliged to share it with rest of HF, especially those who are looking to buy his products.

First of all, to anyone who wishes to buy his products, be a better man than I was and check his UID. You will be amazed at the number of scam reports he has, and the attitude towards him.

Secondly, check the frequency of vouches by the same person on this thread. I assure you, it is not 1.

Something about the seller. He claims to be an ex-hacker, a professional at that. Mind you, he is extremely easy to find on the internet. And is probably much younger than majority of the people here.

Now to the point. I paid for 1 hour lesson with him, money up-front and arranged the time. All seems legit at first. We skype, talk about what are we going to do. Topic: RATs. I download his Rat and apparently, he forgot the password on the RAR.

Now, magic! His net dies and he tries to get it back up working. The ex-1337-hacker's net dies after getting a password protected Rat on my computer.

Naturally, I was respectful and waited for him for 30 min, asked wassup, he is still fixing it. Asked after 1 hour, same thing. 2 hours passed: give me one sec. Now, 3 hours afterwards, no reply. Silence.

I can't post any links or photos or anything since the account on here is new, but I was clearly being respectful and not hasty.

No I am not a hacker, I know jack shit but I want to learn. Hence, why I paid the guy 20\$ for an hour. All I wanted to do was to fucking learn something that I take interest in. Too much to ask for apparently.

Take my word and stay away from Bandors and the wankers who vouch for him repeatedly.

If you guys would please report to this user's thread in the lounge (where he copy/pasted this shit from) you'd see Bandors has replied and is trying to work this out with the user and instead of being cooperative this user is sales trashing (as seen above) and spamming.

So it just shows who is more reputable here. I typically don't like to side with the upgraded/well-known user, but in this case Bandor's isn't in the wrong. Maybe Bandors should have told him he was gonna leave, whatever, but he is back and attempting to resume the lesson and instead of complying this user is well...doing this.

supex0fan - August 28, 2016, 4:30 am

This looks interesting, I will continue learning the basics then return for more advanced lessons.

- 2.- Would I still be able to take the classes whilst having zero coding knowledge?

If basic coding knowledge is needed, please recommend me some good e-books or something, thank you

Vouching for my man right here.

Hired him to make a site for me that ended up being fairly labor intensive but he didn't change the price set we agreed on at the start. He did the whole process on Join. Me so I could watch the progress. I paid him half at the start and half at the end. I also have hired him for coaching lessons for the future. I highly recommend him from lessons to site building. He is really transparent as long; as long as you are clear with what you want done and agree on everything before hand. I wouldn't listen to any negative reviews (very little in between) compared to regular review. Most are misunderstandings or bad communication on the buyers half. I can't wait to learn more things from my man.

- Thank you for doing a speedy job and for the transparency <3

How many hours you think one needs to become decent? I mean to cover most of one subject at a time, also would you be charging the same price for some one that hires you for 5 hours and someone that hires you for 80? Or would you be applying any discounts for long term classes?

The standard course averages 20 lessons. Each lesson is at least an hour. Only the first five hours are 10\$ an hour, in order to let people try it out before buying at my usual rate. I do offer a student program, 250\$ for 20 lessons.

Actually I think it was a different person that just signed up, I asked someone to leave a review lol

darkinterwebz - April 16, 2018, 12:05 pm

Now have done a few sessions with Bandors and they have been amazing.

I believe in any industry or niche you want to find a pro and learn from them, it saves you so much time and you can ask all the questions you need before moving onto the next subject.

I suggest if your new or learning and want to further expand your knowledge and or skills this is the program to help you do so.

Vouch for this! Actually upgrading to a more in depth and advanced course!

Deal - April 16, 2018, 12:14 pm

Huge vouch for Bandors, I've been reading along his hacking helpdesk and this guy really knows his stuff.

I'm more of a solo learner, I learn best by sitting for myself, but if I was to hire a teacher I'd definitely without a doubt hire Bandors.

The price is also fairly low considering the service he offers.

Please send me more info thank you!

Shahenshah - November 30, 2018, 6:25 am

Hi..

Super interested in learning from you.

Willing to pay..

Do you have jabber ?

telmutraider - November 30, 2018, 5:13 pm

Bandors is great and such a good teacher. It's kind of charming actually and I feel like he could do quite well in high school (even one of the poor urban schools) or as one of those cool University professors who haven't been yet broken by the bureaucracy. If you know the book The Hacker Playbook 3 this is a much more easier / funner way to learn, and I say that as someone who almost always prefers the textbook to listening to someone.

I realize I'm just a random person on the internet typing this, but you can mail me at karen.trust@protonmail.com (alias obviously and I'm actually male) and you can ask me questions or call me briefly on Telegram to vouch that I'm not a Russian chatbot.

Thanks for reading,

Boris

Well, I don't teach fraud. I try to stay within US law. I can teach about rats and all that stuff though because teaching is not illegal. As long as I'm not like giving my students 20 free slaves at the end of a lesson.

jackbaur57 - March 26, 2020, 8:12 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
