Elite.'s Middleman Service

What items/products do you middleman?

I will middleman most virtual game item item transactions, specifically items relating to the Steam platform.

Why should we trust you?

I have an extensive history of cash transactions on Hack Forums, but more specifically on Steam. I've also done plenty of Steam item cash trades with no issues whatsoever. My CS:GO REP! thread currently has ~9 pages. I also was an active helper in [this](#) CS:GO Trading Help Desk. I would rather not post my Steam profile publicly on here, but it can be provided in a PM.

How does your MM Service work?

1. Item seller sends the items to me on Steam.
2. Item buyer sends the money to the seller.
3. I trade item to buyer once seller confirms that they have received the payment.

What does this service cost?

My services are free of charge. MM'ing is a way for me to give back to the HF community. I've had nothing but amazing opportunities since I registered on this forum in 2012, and this is my way of giving back to the community.

How can I get you to MM for me?

The seller and the buyer will both PM me on HF to confirm the deal. If dealing via Steam, I will add you both to a group chat.

I can vouch for Elite..

I've known him a while & he's one of the most trusted people in the CSGO Trading community. Any basic google search will show you this. If you have any doubts of Elite's reputation then you're going to have a hard time finding someone to trade with.
