Thread: [Bytecrypter and dark comet?](#)

unrelieved - June 20, 2015, 10:33 pm

My stub works until I try to crypt it with bytecrypter. Anyone else have this problem?

Black Scorpion - June 20, 2015, 10:50 pm

What do you mean? By doesn't work? Like doesn't execute.

Try something other than DarkComet...

Theres a whole list of Free & Paid RAT's Here:

Your crypter could be corrupting the DC Stub, try enable less features, or build a minimalist stub with no features enabled and only enable them through the crypter
