Thread: [Why exactly am I using a vpn?](#)

Spiderpigboi - June 22, 2015, 8:09 am

Why am I using a con exactly? So people can't track my email or snapchat? I don't get how they could do that anyway?? or is it for redeeming?

Erby - June 22, 2015, 8:14 am

You don't need to use one. It is possible for people to track via your E-Mail header, but I doubt 99% of pedos would even know or attempt it. A VPN would be ideal for Skype, however. You can use any VPN to redeem a Amazon GC, or really anyone you get via E-Mail.

Well why I use a vpn is because it's a layer of safety it's better to use one then to not :) why not use a vpn Lol

Better to be safe then sorry ?

I'm just wondering what ways would they track me cause I haven't replied to any emails I only use snapchat and I haven't redeemed and cards yet , but I also haven't used a vpn. Is there any chance they can track me when redeeming my card?

Amazon only tells them that it's been redeemed. In very rare cases will Amazon disclose location, I think it has to be if someone paid via bank and calls in about fraud I think? Anyway, it's pretty rare.

Okay cool, all this rare and 90% chance is scary tho I don't wanna be the 10% that's arrested

Oxinous - June 22, 2015, 8:28 am

To people can't track you, it's really hard to happen that. I personally don't use it.

Outbound's tutorial to tracking a email header:

Step 1: Right click email, view header.

Step 2: Copy header and post it in a header tracking website.

Step 3: Geo-Locate IP and if it's a home IP well you know what you can do with that to get info.

top kek 2 hrd m8

Spiderpigboi - June 22, 2015, 8:33 am

Even if they do track you how accurste is it and what can they do?

The Godfather - June 22, 2015, 8:36 am

so you're one step closer to being anonymous online and so you don't get butchered in your sleep by some ewhore client you crossed on pof.com

Lines that basically identify routing information.

Never said the process was hard, just saying that the pedos would most likely not attempt it.

Talu - June 22, 2015, 10:25 am

You don't really need to use one, but I would recommend it just to be one the safe side.

Ghost - June 22, 2015, 11:34 am

VPN's are pointless for e-whoring, unless you are using Skype then I hope you've turned the option off where your Skype ID can be resolved reveling your IP address.
