A friend of me bought 750 updates. He received 410 Bots to her IRC.

After 2minutes the bots was killed (i think botkilled from the botseller)

The IRC Bot is from Angel Beats (Nathan) and i can say that the Bot is stable cause i've executed 1.5k bots (2months ago) to my friend and it was stable.

After the botkill he write that the bots all was killed and he deleted & blocked my friend.

would not recommend to buy here.
