Thread: [Unofficial HackForums Web Design & Developer Group](#)

Zen - June 23, 2015, 11:42 am

After a decent response to my poll here: <https://hackforums.net/showthread.php?tid=4873842> I have decided to start HackForums very own (unofficial) web design and developer group. I hope this will be a place where members can share ideas, code snippets, projects, and receive feedback. All while hopefully having some fun.

Anyone is free to join however an application format will be required to weed out trolls/time waster. Please fill out the form below and post it as a reply and you will receive a PM with details on how to join.

Application:

Code Name:

Age:

Location:

Web Design/Developer Skills:

What do you hope to get out of this group?

Skype Contact:

All skill levels will be accepted. This is a group for fun and gaining experience.

Thanks

What do you hope to get out of this group? A lot more experience, I mostly do client-sided applications in C# and C++. I would like to learn more about Web Design/Developing since I don't have experience in it. I think it would be a good time for me to learn something other than just applications.

Skype Contact: Pm me for it.
