here's some things to consider -

Spoiler [\(Click to View\)](#)

- no the website hosting the image has nothing to do with this challenge

- and if you're looking for a map, think of my directory as a standalone website. where would you find a list of directories I would want to keep you out of?

-this isn't a hacking challenge, its more of a puzzle

also, since I can't edit op anymore I'll post the solvers list when the challenge ends (in 1 week ish). will post hints periodically if, and will post solution on end of the challenge as always.

edit: -zYMTOM' is first solver :D
