Thread: [RDP cracking guide | User & Pass List | Up to 40 RDP's a day | Start your own shop!!](#)

Ha Haaa - June 24, 2015, 9:56 pm

I have been in the RDP cracking business for about 5 years now. And have resigned as I am too busy with work ATM so this offer is up for sale. This method is not saturated and won't be for a long time.

I am selling my guide on how to crack up to 40 RDP's a day. Comes with my private user/pass list as well which has been tested for nearly 5 years for perfection.

This is exactly 100% what you need to open your very own RDP shop/service. I was using this exact method on my old shop and was making an average of \$30 a day just from selling the RDP's. Perfect for a little side cash or even infecting with your RAT. Whatever you please.

My old RDP thread: <https://hackforums.net/showthread.php?tid=3916389>

Expect to crack 20 - 40 rdps a day easy.

Can be used to install your RAT/Botnet.

Great to mine cryptocurrencies on.

Anonymous browsing.

Even start your own shop and make a large profit.

\$30 BTC

Depp - May 23, 2017, 3:25 pm

So I bought this "method" and it is just the basic method that can be found for free anywhere, as well as the software. The lists are nothing special and everything that I spent \$30 you could get for free with 5 minutes of your time.

I have tried the method for 3 days now and after the 3 days I have managed to crack 4 RDPs total, and I am being refused a refund because it's not his fault if I have a "slow PC". (8 core 4.2ghz, 16GB ram = slow apparently)

I already had 99% of the stuff in this "guide" and the reason I paid \$30 was for an almost public list.

I would like a refund.

I would like a refund.You're an incompetent user refusing to listen to reason. Of course a guide to cracking is public but if you want decent lists you gotta pay for them. My lists are not public. Everyone that has purchased has told me how good it is and the amount they crack.

You even told me you have been trying to crack for only 2 week and you're telling me?

You're so obviously shit talking just to get the guide for free.

You're saying you don't crack many and that's cause you're using a slow home computer.

You dont crack on your home computer. You're suppose to buy a fast rdp to crack with.

I'm here guiding you through it but you shit talk thinking you know everything.
You're not getting a refund if you don't follow my instructions.

Thank you for sharing your opinion.

So I buy an RDP, and that cracks them faster. The RDP is the thing that will get me cracking more, not the guide. If I knew the method was just going to be the basic method, do you not think I would have just purchased an RDP instead? If you're certain that the seller is right, can you justify why I spent \$30 on a extremely basic user and pass list?

So I buy an RDP, and that cracks them faster. The RDP is the thing that will get me cracking more, not the guide. If I knew the method was just going to be the basic method, do you not think I would have just purchased an RDP instead? If you're certain that the seller is right, can you justify why I spent \$30 on a extremely basic user and pass list?

Yes a fast rdp is going to crack you more. You think you deserve a refund because you're not cracking enough. And that's because you're using a very slow home computer to crack.

You will definitely crack over 20 a day if you spend \$10 - \$15 on a vps.

I am currently using an RDP you recommended and getting less than 4 a day. What is the point in paying you \$30 if the only thing is to buy a fast RDP? You still can't answer the question.

I already told you. A brute program runs very slow on home computers. Everyone knows the need a vps to crack with unless you don't mind it slow. Which breaks the refund if you don't follow my instructions properly.

And bullshit you're only getting 4 a day. I've told you numerous times to follow my exact instructions but you refuse and start wondering why you're only cracking 4.

The last sale I made the guy was very pleased with his purchase and told me he's cracking over 30 a day. That's because he followed my instructions which you've failed to do.

Are you blind? I literally just said I purchased the \$15 RDP that you told me to and I am still getting 4 a day.

I have followed everything you told me, so explain that

Ha Haaa - May 31, 2017, 6:18 pm

Still selling. Pm me if interested.

And now you ignore me because you can't argue with the fact it doesn't work. I can prove I have done what you told me to do and that I'm getting barely 4 a day, but you won't refund me like your thread says. Give me a refund.

Ha Haaa - June 2, 2017, 2:46 am

You haven't done everything I've instructed you to do other wise you'd be cracking up to 40 a day. I

am ignoring you for now as you have flamed me and been very disrespectful. All you're trying to do is get the method for free. I'm not stupid.

The tos only work if you follow the instructions properly. You prob scanning some foreign ip range.

Marshmallow Man - June 11, 2017, 9:19 pm

Glws OP, if anyone cracks usa admin residential rdps here then lmk!! ill buy, u can make ur profit from me :D

YoschiW - June 13, 2017, 11:32 pm

Not good.

Buy it for 30\$ and hope i become what for it.

But the "Guide/Tutorial" have just old Public tools and you found the "tutorials" in mass on Youtube and Google :D

So for all the one where want crack RDP's. Dont buy this. Its just Public crap and you become all 4 Free in the Internet.

But hey... HF with the 30\$... its nothing for me ?

I have much bether tools for cracking RDP's there are newer too ?

DONT BUY PUBLIC SHIT like this ?

Ha Haaa - June 14, 2017, 4:18 am

The lists are not public. Feel free to use any tool you want. What matters is the lists. You people saying it's public as soon as you see it has a tutorial to set it up. I added that for the convenience to help noobs out. Ask any experienced rdp cracker. It's all about this lists which is was I'm selling.

DarkHead34 - June 14, 2017, 4:25 am

A bunch of new retards are on the forum here, Can you show me that this list is public, And find another list that can crack 30+ rdps?

DarkHead34 - June 14, 2017, 6:42 am

(Jun 14, 2017 06:41 AM)Depp Wrote: [\[CITE\]](#) Excuse me? The lists he has do not crack more than 10 rdps a day so I don't know what you're on about. As I have said multiple times, I have followed every word he has said and used his "private" lists and I get less than 6 a day.

So, as you keep saying I am not following your instruction, can you please tell me 1 instruction I have not followed?

Becuase you are not using a VPS you stupid braindead?

Ha Haaa - June 24, 2017, 8:42 pm

I'm interested in that guide. It is valid for rdps of all the countries with this method?.

I imagine that for each country, you need a different user and password to the other countries.

It is clear that the user and pass of Germany, will not be nor similar to those of US.
