Thread: [Windows 8 Hotkeys.](#)

**omgifeelhard** - June 25, 2015, 5:32 pm

I play RuneScape, and when playing Runescape, using hotkeys is essential to pk.

I mainly have to use ESC, F1, and F5.

Whenever I hit F1, a box labeled "Windows help and support" opens, and the hotkey does not work ingame. I was hoping someone can direct me on how to disable that hotkey, so that way that annoying box doesn't open anymore. Thanks in advance!

"Windows Help and Support" shortcut is by default Win + F1.

I know this sounds like a strange solution, but on occasion keys can become unstuck. To where any key you press, will have the Windows button prefix to it.

Does F2-F5 work in RS for you?
