SIM-2193483 - July 9, 2015, 7:24 am

Got a copy of this product and I must say it's really great!

OP provided support through installation, he assisted me the whole time.

I would really recommend this to everyone who wants to start their own web-based account generator.

Don't hesitate to buy this! GLWS

you recive the source code encrypted

you upload it to your website.

you add your accounts.

you start selling access to your account generator.

you make cash.

simple as that ;)

Thats strange because you're giving the link to a frontend template, backend is completely coded from scratch.

And if you mind knowing what template I've used for the frontend, its flatlab (
