Thread: [\[TUT\] Windows 8 Theme for Windows 7 \[TUT\]](#)

Finestquad - June 27, 2015, 5:45 am

1. Download the Windows 8 Theme

2. Download this patcher: x86 - x86

: X64 - <http://www.rtwincustomize.net/dnloads/Un...64.exe>x64

Hello Hackforums!

I just changed my style from windows 7 to windows 8. And its looks pretty nice now.
I am going to show you guys how to do it.

screen:

[img]http://fc01.deviantart.net/fs71/f/2013/294/1/9/windows_8_8_1_theme_for_windows_7_by_mare_m-d59vtny.png[/img]

4. Once you have downloaded everything, extract it to the folder that you want.

5. Now comes the tricky part .. Open the folder "Windows 8 ~ 8.1 Themes".

6. Now you will see a number of themes. If you open one "for example: Windows 8 Earth theme"
Then you open it: Windows 8 Earth Theme / Taskbar or Bottom Left / Then you can choose which of the two you want.

7. In the folder, make sure that everything in "C: // Windows / Resources / Themes /" afterwards.

8. When you've done that, you use the patcher (there is simple next patch, so it is easy)

9. If there after patching "Reboot System" then click "OK".

10. When your system restarts, then go to your "Control Panel", then to "Customize Theme", then scroll down there what, then there are some you click Themes Windows 8 theme (double).

And you also have Windows 8 (Actually, Windows 7)!

Lots of fun!

If you have any questions, feel free to ask!

OMG this looks 100% legit as a Real win 8.1 =)

OnePlusUltra - June 27, 2015, 6:38 am

looks awesome ty for the share

Krew - June 27, 2015, 6:39 am

Yeah, I've had this theme for quite some time. It's nice and not as slow as Windows 8 itself is.
