Thread: [\[Tutorial\] MyBB Modify Admin Reputation Exploit](#)

Vaxorr - June 27, 2015, 1:02 pm

Hello.

In this small tutorial i'm gonna explain how to use the MyBB Admin Rep Exploit. This simple exploit allows you to modify a staff's/admin Reputation.

This is in a lot of forums not patched.

anyways let's start with the tutorial:

First Method :

I'll be using google chrome in this tutorial.

first off, visit your desired forum.

then, Press on the menu button in google chrome

Then Choose More tools and click on Javascript Console. Spoiler [\(Click to View\)](#)

Type in the Console the Following and press enter :

Code `MyBB.reputation(UID)` if this worked you will be able to Rep the Admin.

This method can be used in another way.... To Report an Admin's Post.

so instead of typing

Code `MyBB.reputation(UID)` Type :

Code `Report.reportPost(PID);`

UID = User ID which is usually the number in the URL when you visit a profile :

Code `/member.php?action=profile&uid=UIDGoesHere`

PID is the number appears when you click on the post # for example :

Code `/showthread.php?tid=9097&pid=PIDGoesHere`

Second Method:

Simply Use the URL Below :

Code `http://www.YourForum.com/reputation.php?uid=####&action=add`

I guess that's it.

Thanks for Reading ?

Spoiler [\(Click to View\)](#) Don't even try this on HF

You will be able to rep the admin, only by 2-3 reps, depends on forum rules. !
