iOS 8.1.3-8.3 Jailbreaking Guide/Troubleshooting

Download Links:

Windows

Click [HERE](#) to download iOS 8.1.3-8.3 Untethered Jailbreak(Will download upon click.)

Mac

There is currently no version for this program on Mac.

To do this on Mac, you are going to have to run the Windows Version with an emulator.

Tutorial

Another tutorial, discussing how to downgrade your iTunes version.

With the most recent version of iTunes, users have been getting errors, so you will have to use an old version.

Tips

It is advised to backup your iDevices prior to jailbreaking.

If your device needs to be upgraded to iOS 8.3 for jailbreak, you can use the Data-Backup Upgrade Mode of TaiG Pro.

When jailbreaking, you will be required to disable Find my iPhone and your Passcode.

To turn off passcode, Settings > Passcode > Enter your passcode > Turn Passcode Off > Enter your passcode.

To turn off Find My iPhone, go to Settings > iCloud > Find My iPhone > Click to turn off.

Supported Devices:

iOS 8.1.3-8.3 jailbreak is available for the following iOS devices:

Phones

iPhone 4s

iPhone 5

iPhone 5s

iPhone 5c

iPhone 6

iPhone 6 Plus

Tablets iPad 2

iPad 3

iPad 4

iPad Air

iPad Air 2

iPad mini

iPad mini 2

iPad mini 3

iPod iPod Touch 5G

Compatible Tweaks/Apps!

Troubleshooting

How to fix Settings.app crashing issue

[\(Click to View\)](#)

You can fix the Settings app crashing issue by just unpairing your Apple Watch from your iPhone:
Launch Apple Watch app from your iPhone's home screen

Tap on Apple Watch and select 'Unpair Apple Watch'

Note: All user data will be lost on the Apple Watch once it is unpaired from the iPhone. So, please back up your data on the watch, before you proceed.

How to fix apps not downloading/updating from App Store

[\(Click to View\)](#) Launch the App Store and select Updates > Purchased

A pop-up message will appear prompting you to log in to your iTunes account, even if you have already done so

Just enter your password and confirm. That should fix the issue for now and you should be able to download your favorite apps and updates.

Alternatively, you can also fix this issue by going to Settings > iTunes & App Store and re-entering your password at the login prompt. Please note that you should do this even if you are already signed in.

If the issue still persists, perform a fresh restore to iOS 8.3 via iTunes and re-jailbreak your device with TaiG jailbreak 2.1.1

Gonna try this later tonight I'll lyk how it goes thanks

b?xxy - July 5, 2015, 12:49 pm

Updated the guide, going to be adding more.
Let me know of any common problems, etc.

Thanks.
Going to be updating is as needed.

Trisomy 21 - July 18, 2015, 9:47 pm

This would have helped 2 hours ago I uninstalled iTunes 25 times.
